Delivery working days applies to stock items only. Delivery weeks applies to

non-stocked items. Please be aware that bespoke radiators, including Made to Measure and Engineered to Order radiators, can take up to 8 weeks from time of order.

#### Warranties

All radiators have a 5 year warranty, with the exception of electric radiators which have a 2 year warranty.

Stainless steel and select aluminium radiators benefit from a 10 year warranty.

All our extractor fans have a 3 year warranty.

#### **Arteplano**

This radiator puts its best face forward, as the heating tubes are concealed behind a beautiful metal front plate. Choose a colour to pop or blend, or take home a true original in brass or copper - each model is individually etched so every radiator is unique.

#### Ax Spa

With its single or double tube options, the unique Ax Spa can meet all bathroomheating requirements. It is also available as an oil-filled electric radiator. Smaller sizes ideal for fitting under bathroom windows, or within cloakrooms and en-suites.

6 () ()

#### **Balmoral**

The Balmoral is the perfect radiator for large, vintage bathrooms as it heats both the space and keep your towel dry. This Victorian style, ball jointed towel rails comes with a beautiful chrome finish but can also be ordered in a range of fabulous finishes including nickel, brass and antique bronze.

 $(\diamond)$ 

6) 🕢 6)

The Blok radiator complements the clean lines of contemporary bathrooms and kitchens. Compact and with a good heat output, this energy efficient aluminium radiator is suitable for both large and small spaces.

ALU

#### Buckingham

The Buckingham is a transitional wallmounted design, as suitable for modern bathrooms as it is traditional rooms. It is made from chromed steel, and can be used on both central heating and hot water systems, further adding to its flexibility.

38

42

radiator was the winner of the international Designboom competition in 2007, where the designer, Leo Salzedo, styled it as a tribute to the ultimate butler. Its sleek, sinuous form

Move over Jeeves. This eye-catching towel

will ensure that your towels are served warm

### Contents

#### Charleston

The Charleston multi-column, equally at home in modern and traditional settings, comes in an extensive assortment of stocked horizontal and vertical dimensions. There is also a dedicated range with welded-on feet, and can be Made to Measure, angled and curved.

#### **Charleston Bar**

The popular Charleston Bar multi-column with chrome towel bar combines warmth and practicality. Perfect for kitchens and bathrooms. Small sizes ideal for fitting within cloakrooms and en-suites.

 $\bigcirc$ 

#### Chime

This gleaming towel warmer is a great all-rounder. Made from stainless steel, the polished finish it is perfect for wet rooms, alternatively you can now order the Chime our special PVD finishes. With wide rung spacing also allows plenty of space for towels – great for family bathrooms.

#### 🎯 🗭 🤡 🕾 😇 🤅

#### Deline

The classic design of the Deline is sure to suit any bathroom. With its hidden air vent and brackets mounted on the back of the towel rail it is both stylish and practical.

### ۵ 🕫 🚱

#### **Deseo Verso**

Stylish and practical, the innovative retractable bars of the Deseo Verso make it not only a towel warmer but a room radiator rolled into one.

#### Excelsior

The contemporary Excelsior has narrow, vertical, flattened oval steel tubes which give a high heat output. The Excelsior has a fast reaction time and heats up your home quickly.

۵ 🔘

46

58

60

68

#### Fare Tech

The Fare Tech electric radiator combines beauty and brains. Manufactured from aluminium, its unique, elegantly curved shape allows comfortable radiant heat to disperse optimally throughout the room.

#### **Flow Form**

The industrial heating element is now a beautiful radiator in its own right. The Flow Form's spiral fin was designed for technical efficiency whilst providing a stylish finish to any living space.

#### 

Folio Belt

The stunning Folio Belt can feature one or two chrome-plated towel rails, depending on the height creating a towel radiator out of our popular Folio design.

6 🕖

#### **Folio Glass**

Whether it's black, white or even in the form of a mirror, the Folio Glass integrates itself harmoniously into its interior environment with its elegant glass finish.

82

84

86

#### Folio Vertical

 $( \mathbf{f} )$ 

With an impressive flat surface, full closed edging and gently tapered silhouette – Folio is highly appealing with its unusually light appearance.

6

#### Klaro

The Klaro is an affordable style, suitable for central heating systems or for use with an immersion heater during summer when the central heating is turned off. Smaller sizes ideal for fitting within cloakrooms and en-suites.

6 🗭 🚱

 $(\diamond)$ 

#### Lissett

 $(\diamond)$ 

 $(\bigcirc)$ 

The sibling of our popular Svelte radiator, the Lissett radiator has the same graceful style but with a larger heat output and more space for towels, making it a great choice for family bathrooms. Made from recycled aluminium it's not only eco-friendly but it also heats up faster and more efficiently than traditional designs.

(ALU)

The Metropolitan has a contemporary, minimalist appearance. Designed in Italy by the award-winning King & Miranda, the Metropolitan has beautiful clean lines creating a geometric shape. Smaller sizes ideal for fitting under bathroom windows.

#### **Metropolitan Spa**

The Metropolitan Spa towel radiator brings an elegant, spa-like style to any modern bathroom. Connections and air vents are neatly hidden to maintain purity of the design. Smaller sizes ideal for fitting within cloakrooms and en-suites.

#### Olga

6 🕖 🚱

The Olgas stylish mix of round and square tubes makes it a very versatile choice, as it complements a wide variety of bathroom styles. Made from stainless steel it is also a great choice for wet rooms and we have selected a handy range of sizes to suit different installations.

(d) 🕢 🚱 🔄

#### Orbit

Made of highly polished stainless steel, the Orbit will shine in any bathroom or wet room. Its dynamic design is at once both modern and retro and we have included neat detailing such as adjustable brackets and hidden air vents. The Orbits looping tubes allow plenty of space for towels.

(Ŧ)

#### Osbourne

The Osbourne is a floor-mounted model offering plenty of space for luxurious towels, it is an equally stylish option for industrialstyle homes and loft bathrooms thanks to its antique look. This towel rail is also available in a number of deluxe finishes, from bright nickel to polished brass.

#### (d) (F) (d)

96

104

108

#### Ovida

What sets the Ovida apart from the rest is the upmarket tube-on-tube design. Stylish and practical, it has closely spaced tubes which not only make the proportions more elegant but also improve the output of the towel rail.

#### **Ovida Bow**

The Ovida Bow is a stylish tube-on-tube bowed radiator providing ample space for hanging towels.

120

124

112

#### Pera

6 🕢 🚱

Less is definitely more with this chic stainless steel towel rail as the refined construction allows the tubes to meld gently into one another. The Pera brings a quiet elegance to both modern and traditional bathrooms.

#### 6 🗭 🔮 🕾 PVD

#### Quaro Spa

The Quaro Spa has an elegant square profile frame and horizontal heating pipes. Beautifully designed with clarity and simplicity, even the right-angled wall brackets are stylish. Smaller sizes ideal for fitting within cloakrooms and en-suites

#### Ribbon

The super sleek and stylish Ribbon towel radiator is suitable for modern bathroom interiors and available in a range of sizes, and in over 50 finishes including chrome, white and matt black

#### Roda

(d) 🕢

A simple, effective and efficient radiator, the Roda is perfect for all living areas, and is also available Made to Measure.

128

132

5

1-1

### Contents

#### **Roda Mirror**

With a full-length mirror to enhance its elegance, the Roda Mirror radiator is a stylish asset to any home.

140

#### **Roda Spa**

The Roda Spa combines practicality and contemporary design and a high heat output that will warm even the largest of bathrooms. Smaller sizes ideal for fitting under bathroom windows.

#### **Roda Spa Asym**

The Roda Spa Asym is a highly functional and stylish towel rail with a practical asymmetrical design that allows towels to be hung easily. The central heating model is available with horizontal tubes facing either left or right.

#### **Splash**

Made from Corian® the Splash is not only a radiator, but also an art piece - creating the perfect focal point for open plan living spaces.

#### **Stellar Spa**

The Stellar Spa is contemporary in design with its stainless steel finish. Ideal for wetrooms and suitable for dual energy installation. Smaller sizes ideal for fitting under bathroom windows, or within cloakrooms and en-suites.

6 🗭 🚱

#### Subway

The Subway is a simple yet elegant towel rail. Stocked in either white, chrome and three other colours as standard. Smaller sizes ideal for fitting within cloakrooms and en-suites.

150

152

٢

#### **Svelte**

The prima ballerina of radiators - slender, graceful and versatile - the Svelte looks equally at home in luxury spa bathrooms and contemporary kitchens.

## (ALU)

#### **Tetris**

Creating a fusion between nature and architecture, the latest towel radiator design by renowned design studio King and Miranda exclusively for Zehnder, the Tetris is inspired by the flow of a river and the rhythm of flight.

64

#### Vision

 $(\diamond)$ 

(()

Offering simple yet beautiful design, the Vision works seamlessly in en-suites, family bathrooms and cloakrooms alike. With discreet brackets and a stock range of stunning finishes, the Vision will be an eyecatching accompaniment to any popular bathroom style.

Yucca Asym

(67)

The Yucca Asym is a beautiful but practical towel rail. Available with single or double tubes in either white or chrome, the Yucca Asym can be installed perpendicular to the wall to create a partition.

168

#### Yucca Symm

64

The Yucca Symm is a palm-inspired radiator that blends style and functionality. Ideal for hanging towels and clothing, its symmetrical tube design offers easy access from both sides

(())

#### Zenia

The revolutionary Zenia thermal comfort unit supplies pleasant heat quickly and ensures ultimate comfort heating in your bathroom independently of the central heating system. At the same time you can dry and warm towels behind a visually appealing heated glass door.

Temperature controller: Backlit LCD digital display screen gives complete control. Temperature can be adjusted in 0.5°C increments.

3 pre-set programmes and 5 mode settings. Open window detection system and parental lock. 7 day programmable function.

#### **Open Window detection**

The Integral control unit recognises if a window has been opened for an extended period and switches the radiator off. Once the window is closed, the radiator returns to normal operation.

- Temperature changes are quickly recognised via the external temperature sensor
- The integral thermostat proactively reacts to sensor information; delivering the perfect indoor climate
- Intuitive radiator which automatically switches off if a window is open for an extended period
- An intelligent heating solution which lowers costs and energy consumption

All dimensions in mm

The Alura is a fast response electric aluminium radiator with a high heat output despite its compact size. It is lightweight and easy to install, plus the straightforward digital controls make it easy and economical to use. H shaped mounting brackets with a removable spirit level and locking system are also included.

\*Traffic White (RAL 9016)

Colour finish: Colours from the World of Colours chart are priced at: Traffic White (RAL 9016) + 25%. Colour finish and non-stock products delivery: 3–5 weeks.

The mirror finish has a 9% reduction in output

Projection from wall to front face: 74 mm - 79 mm

All dimensions in mm

every radiator is unique.

For pipes from wall we recommend VALVE-SET-10 for horizontal models. It is available in a complementary brass or copper finish, see page 188.

This radiator puts its best face forward, as the heating tubes are concealed behind a beautiful metal front plate. Choose a colour to pop or blend, or take home a true original in brass or

copper - each model is individually etched so

#### Bespoke Design

The Zehnder Arteplano is also available as a Made to Measure option, allowing unique sizes to be created.

\*Traffic White (RAL 9016)

Also available in a range of exclusive finishes. Please see the next page for full details.

To make the Zehnder Blok a towel radiator please add a single BLARS-033 or BLAR-033 to orders. Please note: Additional towel rails (3 max) can be added to the 160 & 190 models. Please ensure a minimum of 315mm vertical spacing between each rail.

Accessories				
Model		Finish	RRP (ex VAT)	RRP (inc 20% VAT)
BLARS-033	Zehnder Blok Rail for cloakroom. Length spans 2 elements (adds 38mm to front face)	Polished Aluminium	£180	£216.00
BLAR-033	Zehnder Blok Rail. Length spans 2 elements (adds 66mm to front face)	Polished Aluminium	£180	£216.00

All dimensions in mm

Calm and chic, the Blok towel radiator complements the clean lines of modern bathrooms and kitchens. Compact and with a good heat output, this energy efficient radiator is suitable for both large and small spaces.

Zehnder recommends VALVE-SET-37. For more information see page 189.

### **Technical information**

Please note: We only supply complete radiators. Additional sections cannot be joined to our stock range of radiators. The number of sections/ width is virtually unlimited. Practicality regarding weights, handling and accessibility should be taken into consideration. Large radiators may be supplied in modules to be assembled on site. Lead times - Please allow 6-8 weeks for curved, angled and engineered to drawing.

Radiators are supplied with bottom opposite end connections as standard. For underside connections, please specify at the time of ordering.

Angled and curved radiators are also available. Angled radiators: Prices on application. Please

contact your Zehnder stockist or a member of our sales team for further details.

Curved radiators: Please multiply the prices for standard radiators by 2.

> \*1/2" air vent Width excludes air vent F = flowR = return H = height W = width Tube: Vertical Ø25mm All dimensions in mm

The classic Charleston is one of our most versatile radiators. The vertical sizes are perfect for any living space areas including stairs, alcoves and by French windows.

The Zehnder Charleston multi-column can be Made to Measure, with bespoke heights, widths, depths and colours.

If you're looking for something more specific, get in touch to explore our Engineered to Order options.

Ander Charles

azer made

Prices for EasyFix Brackets are given as a guide – please contact us to determine which brackets you require depending on the size of your radiator. Note: The amount of pieces required depends on the radiator height and width.

When purchasing a radiator with welded on feet and with an even number of sections, the middle foot will be placed in the first of the middle two sections. 57

It's the considered details which make the Deline stand out from the crowd – discreet brackets, hidden air vents and a stock range of seven fabulous finishes which complement popular bathroom surfaces.

Zehnder recommends VALVE-SET-28.

Discreet air vent located on the back of the radiator.

For models in volcanic and matt black finish, manual valves sets 26, 27 & 28 are now available in a complementary finish.

The contemporary Excelsior has narrow, vertical, flattened oval steel tubes which give a high heat output. The Excelsior has a fast reaction time and heats up your home quickly.

### Bespoke Design

The Zehnder Excelsior is also available as a Made to Measure and Engineered to Order option, making it ideal for awkward spaces including loft conversations and under stairwells.

887220	Zehnder Connect hub for Fare Tech radiator.	£273	£327.60

### **Open Window detection**

The Integral control unit recognises if a window has been opened for an extended period and switches the radiator off. Once the window is closed, the radiator returns to normal operation.

- Temperature changes are quickly recognised via the external temperature sensor
- The integral thermostat proactively reacts to sensor information; delivering the perfect indoor climate
- Intuitive radiator which automatically switches off if a window is open for an extended period
- An intelligent heating solution which lowers costs and energy consumption

The Fare Tech is an electric radiator which combines beauty and brains. Manufactured from aluminium, its unique, elegantly curved shape allows comfortable radiant heat to disperse optimally throughout the room, whilst its smart integrated control panel allows the room temperature to be easily set and energy consumption controlled.

### Zehnder Folio Vertical

width

### Zehnder Folio Vertical Electric

Available as both a central heating and electric radiator Projection from the wall to front face: 85mm Electric version controlled via radio frequency remote programmer

Sleek, subtle, yet sophisticated. With its tapered design, the Folio Vertical is the perfect room radiator providing a statement and plenty of heat with its honeycomb heating system.

Zehnder recommends VALVE-SET-11-CR see page 188.

The aluminium honeycomb structure, with its meandering copper pipe, is filled with graphite, enabling heat to be distributed throughout the entire front of the radiator quickly and evenly. Suitable for all low temperature systems, heat pumps, condensing boilers, open or closed heating systems.

Selection

Accessories				
Model		Finish	RRP (ex VAT)	RRP (inc 20% VAT)
LRS-040	Zehnder Lissett Towel Rail for cloakroom. Length spans 2 elements (adds 45mm to front face)	Polished Aluminium	£207	£248.40
LR-040	Zehnder Lissett Towel Rail. Length spans 2 elements (adds 65mm to front face)	Polished Aluminium	£210	£252.00

The older sibling of our popular Svelte, the Lissett has the same graceful style but with a larger heat output and more space for towels, making it a great choice for family bathrooms. The rail is made from highly polished aluminium and allows plenty of space for sumptuous towels.

Also available in smaller sizes, ideal for cloakrooms

The Metropolitan Spa towel radiator brings an elegant, spalike style to any modern bathroom. Connections and air vents are neatly hidden to maintain the formality and purity of the design. Geometric cut-outs create an attractive shape with plenty of space for towels to dry. Also available as a room radiator.

67 Dual energy: Self fit (additional cost to central heating model prices). For more information please scan the QR code.

Tube: Horizontal Ø18mm Vertical 30mm x 30mm All dimensions in mm

The Olga stainless steel towel rail can be installed on a hot water system with a supplementary heater, so that towels will remain warm and dry even when the central heating system is turned off. The narrower widths are great for small bathrooms and cloakrooms.

Supplementary Heater Connection Electric DE-PACK thermostat supplied in chrome to match towel rail. Please note that pipe centres may be affected.

Zehnder recommends VALVE-SET-27. For more information see page 187.

#### **Open Window detection**

The Integral control unit recognises if a window has been opened for an extended period and switches the radiator off. Once the window is closed, the radiator returns to normal operation.

- Temperature changes are quickly recognised via the external temperature sensor
- The integral thermostat proactively reacts to sensor information; delivering the perfect indoor climate
- Intuitive radiator which automatically switches off if a window is open for an extended period
- An intelligent heating solution which lowers costs and energy consumption

\*Traffic White (RAL 9016). Non-stock products delivery: 4-6 weeks.

Please note: when ordering, please specify whether you require pipe connections to the wall or the floor, as there are specific fitments on the Svelte.

straight or angled valves are supplied with this radiator (see separate sheet for fitting instructions)

please note: the internal tube will rattle when the radiator is unpacked. This is normal and will not happen once the radiator is installed.

All dimensions in mm

A set of compact, manual valves are included with the radiator. When ordering, please specify if pipe connections are to the wall or the floor.

51-64

straight valve (to floor)

The Svelte is the prima ballerina of towel radiators - slender, graceful and versatile. Made from aluminum, it has a fast response time which can be particularly useful in bathrooms and kitchens where large temperature fluctuations are common.

#### VOLCANIC

Thermostatic Control (optional upgrade) For improved energy efficiency, upgrade to a thermostatic head. Model code: 819088 Price: £31 excluding VAT

Please indicate on your purchase order whether you require straight valves (pipes from floor) or angled valves (pipes from wall)

# Bespoke radiators

Whether manufactured to a special size, angled or curved, our bespoke radiator designs allow for a truly customised heating solution.

ZEHNDER EXCELSIOR

#### Made to Measure

Zehnder radiators are very much part of the interior design planning process. They can set the scene for a room design, adding to the ambience, and becoming a central aesthetic element of the interior decor.

#### To add the perfect radiator to your home

- Select the height, width and depth you need to fit the space perfectly and to achieve your desired heat output
- Choose the colour, finish and valves to match your interior
- Add your accessories including towel bars and hooks, making your radiator functional as well as stylish

#### **Engineered to Order**

ZEHNDER CHARLESTON

Any size, any space. The Zehnder Engineered to Order (ETO) range enhances even the most awkward of spaces, offering unlimited options and countless opportunities.

- Pick your space where you would like your radiator to go e.g. lofts, stairways, bay windows, around pillars
- Contact your local Zehnder showroom to discuss your options
- Agree shapes style and colour of your radiator for this to be
- designed manufactured and installed into your home

ZEHNDER CHARLESTON

#### **Applications**

#### **Room divider**

**Trapezodial** 

The Zehnder Excelsior is able to be custom made to follow the contours of your staircase perfectly, making it a stunning feature that is both practical and elegant.

The Zehnder Subway radiator can provide efficient heating and a striking visual element to your home by acting as a transparent divider between kitchen and living areas.

## providing exceptional heating performance.

#### Curved

Angled

The Zehnder Roda radiator is expertly crafted to fit perfectly into the corners of any room, effortlessly blending into the overall

design scheme while

The Zehnder Charleston can be uniquely designed to adapt to the dynamic architecture of any room, providing efficient heating without compromising on style or functionality.

**/entilation** 

## Low-water temperature radiators

Achieve a new level of efficiency

With the reduction in operating system temperatures, especially in conjunction with heat pumps, the need for radiators that offer good output with lower flow temperatures is growing in significance.

All our radiators are suitable for low-water temperature systems, but the Zehnder Charleston and Zehnder Excelsior, with their Made to Measure options, are able to provide a multitude of configuration options which make them exceptionally compatible with heat pumps.

Regarding heaters for bathrooms or kitchens, the double-layered Zehnder Ovida and Zehnder Yucca models are ideal. These models not only maintain the aesthetic appeal of a 'ladder rail' look but also ensure effective heat output at lower system temperatures.

- Energy-efficient
- Powerful
- Fast response
- Perfectly matched to the heating system
- Available from our stock range or custom-made
- In a range of models and surface finishes

Get in touch to learn which radiators would be best suited to your system.

201

## Dual energy & electric radiators

Zehnder's electric heating system offers the flexibility to operate solely on electricity or in combination with the central heating system for dual energy operation, ensuring optimal heating all year round.

A comprehensive range of Zehnder bathroom radiators are available as electric radiators, including the stylish Zehnder Ribbon, and existing central heating models can be easily retrofitted with an electric heating element.

With Zehnder's electric radiators graded by both price and comfort classes, you can choose the perfect heating solution to meet your needs.

Here, you can explore our full range or electric and dual energy radiators

# Electric Immersion Heaters

With our new generation of immersion heaters, Zehnder is setting standards that go far beyond heating. Easy to install and with intuitive controls, these immersion heaters provide the maximum user comfort.

Targeted radiator controls are another impressive feature, helping to reduce energy costs while reducing the environmental impact at the same time.

Get ready for the future with the new generation of immersion heaters.

#### **Clear advantages**

- Simple and intuitive
- The perfect solution for a wide range of individual needs
- Modern and elegant design
- Save the planet and money too, through targeted energy use

#### State-of-the-art technology

- Adjustable surface temperature
- Temperature controls for each room
- Timer function
- Daily and weekly programming via the app
- Integrated energy efficiency in line with ecodesign requirements

Here, you can find out more about the compatibility of the new immersion heaters with our radiators, as well as other technical information

# Easy to use in every way

#### The Zehnder Immersion Heater Control (IHC)

The Immersion Heater Control (IHC) is a new, versatile immersion heater from Zehnder. Thanks to its modular operating concept, it suits a wide range of needs and is extremely user friendly.

Choose how to control the radiator: directly using the dial, with a remote control or using the handy Zehnder Connect app.

Every option is intuitive and self-explanatory. The LED matrix display shows the current operating status in a clear and simple way. In addition to its easy, comfortable range of controls, the IHC is also sustainable, as the electronic control unit can be replaced independently from the immersion heater.

#### Control directly from the immersion heater

LED matrix display

Rotary knob

Press and rotate the knob to switch between the various heating modes and adjust temperatures and configurations.

Simple, intuitive control without additional devices

Ventilation

Easy remote control

2

3

The Easy remote control, which can be ordered separately, is designed to manage basic functions used on a daily basis, such as "On/Off" and "Adjust room temperature".

A wall mount is provided for installation at a convenient height, and the remote control can be taken out of the mount for use. The remote control can also be used without a base mount.

Comfortable control at a convenient height

### Zehnder Connect app

Use the Zehnder Connect app to control radiators via a Bluetooth-enabled smartphone, with options to set up additional functions such as a weekly programme.

Smart controls with precise settings

**Colour options** Available in three different colours (black, white and grey) with a modern design featuring an LED matrix display

Here, you can find out more about the compatibility of the IHC with our radiators, as well as other technical information

## Sustainable and easy to integrate

## The Zehnder Immersion Heater Easy (IHE)

The Immersion Heater Easy (IHE) is an integrated option for smart home systems with on-site control. The new technical Zehnder patented solution reduces output in the upper temperature range to 50%, limiting temperature fluctuations and saving energy. This also extends the immersion heater's service life, making it more sustainable.

The IHE is factory-fitted directly into the following electric radiators:

- Deline Electric
- Klaro Electric
- Ovida Electric
- Ovida Bow Electric
- Subway Electric

Here, you can find out more about the compatibility of the IHE with our radiators, as well as other technical information

## Manual valves

Manual valves offer straightforward control of your radiator, functioning simply as an on/off control. This allows for direct operation of your heating system. The key benefits to manual valves are that they're reliable, easy to use, and discreet in appearance.

## **Thermostatic valves**

Thermostatic Radiator Valves (TRVs) offer a sophisticated mechanism for regulating room temperature. They automatically adjust the heat by closing off the radiator when the room reaches the set temperature, reopening when the temperature drops. This provides an energy-efficient solution for maintaining a comfortable room temperature.

Please note: Thermostatic valves must be fitted to the flow side, as they are not bi-directional.

### Please note: Thermostatic valves must be fitted to the flow side, as they are not bi-directional.

## You are what you Heat

The Manufacturers Association of Radiators and Convectors (MARC) is committed to product satisfaction and consumer assurance. As members, Zehnder pledges to raise standards and compliance through a series of initiatives. The first of these initiatives is a targeted consumer campaign.

Launched in July 2020, the 'You are what you Heat' campaign explains the importance of having CE markings on all radiators. This helps ensure that heating systems and homes are fit and healthy, and that consumers are receiving high-quality products that have been fully tested and approved.

## What will happen if I end up with a radiator that is "under sized" due to incorrectly published outputs?

- · It will not adequately heat the space it was purchased to heat
- In order for you to be warm enough, it will be necessary to run the boiler at higher temperatures than would have been necessary
- · You will burn more fuel and in turn create more CO2 emissions
- Burning more fuel will increase your heating costs
- This may affect the life cycle of the boiler or heat source

**By purchasing a Zehnder radiator you do not have to worry about any of the above.** All of our radiators are independently tested and conform to the highest of standards. As proud members of MARC, Zehnder have and will continue to play an integral part in delivering high-quality heating products with true heat outputs.

To find out more visit: https://www.zehnder.co.uk/company/news/marc-you-are-what-you-heat

## **Affiliated companies**

Zehnder are proud to be members of The Manufacturer's Association of Radiators and Convectors, an organisation established to focus on creating & maintaining the highest industry practices and standards.

Zehnder products are listed within the TruBlue software, an advanced platform which helps showrooms manage and process orders.

$(\vee)$	v	I R	T	U	A	L
	w	O	R	L	D	S
	A Cync	ly Com	bany			

Zehnder products are included in the Virtual Worlds design software meaning you can see how your radiator will look in your bathroom before it is installed.

Zehnder products are available in the EQ software package, making it easy for showrooms to add these to an overall bathroom order.

## **Eco Design** Regulations for electric heating

Since 1st January 2018, all electric local space heaters manufactured for sale in the EU must comply with a minimum efficiency standard under Lot 20 of the Energy Efficiency Directive. This was one of the biggest changes the electric heating industry has experienced in decades.

Zehnder products that fall within the scope of the Eco Design Directive offer high quality performance with efficient controls to help reduce unnecessary energy wastage and running costs including;

- Low energy consumption when on stand-by (<0.5 watts)
- Programmable operation (weekly)
- Open window detection

## Ventilation

100% adjustable speed

Ventilation

### 193

## Zehnder Low Energy Continuous Fan Ø100mm

Continuous ventilation ensures a continually fresh environment with a constant low level trickle. The automated boost fan mode will come on if there is a high level of moisture in the room.

This low-noise, low-energy design costs as little as  $\pounds$ 1.50 to run for the entire year. It operates discreetly in the background, ensuring mould and condensation are kept at bay. SMART humidity and timer controls eliminate nuisance noise and running, leaving you to relax in the serenity of your bathroom.

Ceiling Application (unit can be wall or ceiling mounted)

ZCV2 Controls

	ZGG42BA	100mm External grille with spigot in brown	£5	£6.00

### Zehnder Adaptive fan with "SMART" timer technology.

The length of time of the fan over-run is based on occupancy duration, up to a maximum run-time of 15 minutes, reducing heat loss and energy usage.

### Zehnder Adaptive fan with "SMART" humidistat and timer technology. The fan knows the normal humidity

level and only activates when spikes occur, providing the right amount of ventilation when required, unlike fans with a generic point that respond to high ambient humidity on a summer's day and particularly in the middle of the night.

## Zehnder Silent Wall & Ceiling Fans

In stock items highlighted in black	Description	Controls	Airflow I/s in FREE AIR (BS848 Pt 1)	Sound pressure level @ 3m dB(A)	Energy consumption (W)	IP Rating	RRP (ex VAT)	RRP (inc 20% VAT)

## Zehnder Halo Designer Shower Fan & LED Light Kit

In stock items highlighted in black	Description	Controls	Airflow I/s in FREE AIR (BS848 Pt 1)	Sound pressure level @ 3m dB(A)	Energy consumption (W)	IP Rating	RRP (ex VAT)	RRP (inc 20% VAT)
ZHC115ETSKA	125mm Halo timer ceiling fan shower kit and LED light	Single speed, 230V. Operation by light/remote switch Adjustable timer (2-30mins and factory set at 15 mins). Kit includes 125mm induct fan, internal grille with low voltage 12V light and transformer, 900 bend, 3 metres of flexiduct, 4 fixing clips, ceiling grill and fixing screws. White & Chrome bezels provided.	56	31	Fan 20W, 12V lamp rated at 6W	IPX4 Zones 1 & 2	£169	£202.80

Length of ductwork should not exceed the length of the ducting supplied. Recommended for discharge through an external wall or soffit, but not the roof.

Soffit installation

Silent Fans are 70% quieter than standard axial fans when operating. Supplied as shower kits with or without an LED light in "warm white" (2700K).

ZSR100ETSKA

Today's luxurious showers and bathrooms call for high performance and high-quality design. The Halo is a ceiling extractor fan supplied as a kit with an integrated LED light in "warm white" (2700K).

Selection

## Colours and special finishes

Most of our radiators come in 2-3 finishes, complementing various interiors, with a range of other options to order. The following pages display our popular colours and finishes. To see which radiators are available in specific finishes, consult the following page's colour system tables. If your desired finish isn't displayed, we can arrange certain models to be painted in a wide range of RAL or NCS colours (price on application), provided the colours column in the tables has a  $\blacklozenge$ .

### **Metal Surfaces**

A number of our radiators are available in Chrome and Brushed Stainless steel as standard finishes. We also have a variety of exclusive surfaces which are only available for our Zehnder Charleston range. Get in touch with us or speak to your local showroom if you'd like more details on these finishes.

Technoline (Clear) 0325 Gloss

Rose Copper finish (gloss) Only available for Charleston range

Chrome (Surface 0008 Matt

Rustique finish (gloss) Only available for Charleston range

Stainless steel brushed 9517 Matt

0422 Black-silver hammered finish (gloss) Only available for Charleston range

0421 Copper-black hammered finish (gloss) Only available for Charleston range

### **Exclusive Aluminium Finishes**

All five of these finishes are available exclusively with Zehnder Blok, Zehnder Svelte, and Zehnder Lissett aluminium radiators.

Champagne

SAP10020

**Marron** SW208F

Nickel Look M3000L

White Sable SBP9010

0371 **198** 

Aluminium

### **Deluxe Finishes**

These Deluxe finishes are available to order on the Zehnder Balmoral, Zehnder Buckingham and Zehnder Osbourne radiators.

### **Arteplano Finishes**

The Zehnder Arteplano and Zehnder Arteplano Premium include six exclusive finishes in addition to colours available from our World of Colours colour chart.

#### Brushed Black 9536

Brushed Bronze 9535

Mirror 9516

Etched Brass 9521

Etched Copper 9523

Anodised Aluminium 9501

### **PVD Finishes**

The Zehnder Chime and Zehnder Pera are both available in three stunning PVD finishes in addition to our Stainless Steel Mirror finish.

Brushed Black Chrome N211

Brushed Bronze N213

Brushed Brass N209

\* due to the manufacturing process, these finishes are unique to each individual radiator.

### **Colour matching service**

We offer a unique colour matching service which allows you to match your radiators to popular paint ranges such as Farrow & Ball, Little Greene and Dulux. We can also match to other items such as wallpapers and kitchen cabinets.

All we require is a sample of the colour you want and we can then advise the closest match. There will be a small charge (<  $\pm$ 10) to organise each proof, to ensure that you receive the precise colour. Please note: As with all colour matching services, every colour is unique meaning prices are only available on application. Colour matching is only available on products that are marked with a + in the colour matching column above.

Contact a member of our team for prices and lead times on our colour matching service.

## World of Colours

The World of Colours brings you the latest on-trend colours and finishes to elevate your decorative radiator, while also offering popular and timeless classics.

Comprised of five colour worlds, divided into warm and cool colours, Zehnder worked closely with leading interiors and colour experts to curate this trend-driven colour palette. The World of Colours is designed to help you match your radiator to your personal style and complement your home décor perfectly.

Choose from a wide range of finishes, including vibrant, bold colours and subtle, calming tones.

### **The Sanctuary**

The home as a place of rest, relaxation and retreat

The home is a place of relaxation and tranquillity. Rough surfaces, brushed finishes, mixed glazes and natural materials create sanctuaries. Natural off-white, light brown and grey tones are the key to a cosy environment to relax in. Brushed metals such as brass mixed with wood create a modern contrast. Round shapes and soft textures soften any feeling of austerity.

### The Mystical Home

A private place for personal rituals and wellness

Rough, natural surfaces contrast with refined designs. Rough concrete textures mixed with polished stone surfaces create a multi-sensory experience. Black and dark grey shades, graphite and taupe are the key to a mystical home. The monochrome rooms are accentuated by dark blue tones and brushed metal. The muted colour palette is made for a tranquil space for personal rituals and wellness.

### **Mother Earth**

Terracotta as a symbol for a warm and earthy look

Terracotta helps to create an earthy and warm look, both as a material and as a colour. The highly pigmented quality of terracotta and the deeply saturated but sun-faded solid colours create a natural and sophisticated look. Shades like cotton white, ochre, brick red and brown are combined to create an earthy colour palette. Terracotta is symbolic of the earth we live on and our strong desire to protect it.

### **Neo Green**

Reflections on our desire for a natural environment

Green tones create a balance with our desire for more nature in our lives. Walls and floors, but also textiles and décor appear in shades of green. Soft, delicate mint or petrol-coloured graphite reflect our desire for a natural environment. Nude, light brown and grey tones create harmony and calm.

The full World of Colours chart can be found at the back of this brochure

### Mono Material Concrete

The continuity of space – raw, seamless, expressive

The use of a single material creates a seamless, uniform look and a quiet space – free from visual noise. Raw concrete flows from the interior to the exterior, giving continuity to the space. Eccentric orange and natural brown tones create a modern contrast. Home accessories in brushed metal are ideally combined.

## World of Colours

Choosing and ordering a product in one or more of these exciting colours couldn't be easier.

## How do I select a gloss or matt finish for my radiator?

All gloss finishes are indicated in this colour chart with both the wording 'Gloss' and a diamond  $\heartsuit$  icon.

For example, if you choose to place an order in the finish Jet Black, this has a gloss finish as shown below. When ordering this finish please use the colour code 9005.

**Jet Black** 9005 Gloss

All matt finishes are indicated in this colour chart with the wording 'Matt'. These finishes do not have the diamond icon.

For example, if you choose to place an order in the finish Reseda Green, this has a matt finish as shown below. When ordering this finish please use the colour code 6211.

Reseda Green 6211 Matt

## Can I order a product in gloss if it doesn't have the diamond symbol?

Yes, this is possible in most cases. Please contact our customer service team to discuss which finishes can be produced. If this is possible then the surcharge will be the same as the matt version. You will also need to highlight the request for gloss when placing your order.

## Can I order a radiator in matt if it has the diamond symbol?

Yes, this is possible in most cases. Please contact our customer service team to discuss which finishes can be produced. If this is possible then the surcharge will be the same as the gloss version. You will also need to highlight the request for matt when placing your order.

## Are there additional costs for colours from this colour chart?

All colours in this colour chart incur a 25% surcharge on the standard Traffic White (RAL 9016) finish price.

## Can I have radiator made in a colour that is not in this colour chart?

Colours (in the RAL and NCS colour ranges) and/or finishes which are not included in the World of Colours chart incur a RRP surcharge (in addition to the coloured price) of  $\pounds$ 330 (excluding VAT) per radiator. Please see page 201 for details on our colour matching service.

## **General Information**

### **Heat Loss Calculator**

This easy-to-use heat calculator can work out the heat requirements for your room.

### Stage 1 Take the room dimensions in metres

#### Stage 2 Heating requirements per room type

Living Room / Dining Room / Bathroom volume

multiply volume as calculated in Stage 1 by 50 = \_\_\_\_\_ Watts required Bedroom volume

*multiply volume as calculated in Stage 1 by 40* = \_\_\_\_\_ Watts required Kitchen / Hallway \_\_\_\_\_ volume

multiply volume as calculated in Stage 1 by 30 = \_\_\_\_\_ Watts required

#### Stage 3 Other factors for consideration

Is the property exposed? Does the room have large areas of glazing?

Are the windows double glazed?

If factor 'a' applies, increase the Watts required at Stage 2 by 15% If factor 'b' applies, increase the Watts required at Stage 2 by 20% If factor 'c' applies, decrease the Watts required at Stage 2 by 10% If factor 'a' and 'b' apply, increase the Watts required at Stage 2 by 35% If factor 'a' and 'c' apply, increase the Watts required at Stage 2 by 5% If factor 'b' and 'c' apply, increase the Watts required at Stage 2 by 10% If factor 'a', 'b' and 'c' apply, increase the Watts required at Stage 2 by 25% Please note that this calculator is provided as a guide only.

To convert Watts to BTUs, multiply by 3.412.

For an approximate conversion from  $\Delta$ T50°C to  $\Delta$ T60°C, multiply the  $\Delta$ T50°C output by 1.2.

### Terms and Conditions of Trading

A complete copy of the company's terms and conditions of trading are available on our website www.zehnder.co.uk

In addition to the Terms and Conditions, please note the following:

- All delivery times quoted are estimates only. Prices quoted include free delivery to the UK mainland. Any orders with a net
  value less than £50 net will be subject to a processing and delivery fee of £10 +VAT.
- Returned goods for credit will only be accepted by prior arrangement (confirmed in writing), within 8 weeks of the date of despatch, where the goods are part of our stock range and where the goods are as fit for sale on their return as they were on delivery. If goods have been fitted this is deemed as acceptance of their quality. We cannot accept the return of non-stock goods.

а

b

с

- Damaged products are to be reported to us within 3 days of delivery. Zehnder cannot be held responsible for any damage
  after onward delivery. Faulty products are to be reported to us as soon as possible. If the items have been installed, you
  are in acceptance of it's condition and Zehnder reserve the right to refuse credit.
- You are responsible for ensuring the suitability, conformity and interoperability of the goods or indicative system design
  suggestions provided by us with your heating system and your design requirements. It is important that you undertake such
  verification with an appropriately qualified expert third party
- Where a radiator is returned as no longer required and an alternative radiator is not ordered a 25% restocking fee plus a £10 administration fee will be charged (unless the goods were defective when delivered). If a radiator is no longer required but an alternative radiator is ordered, either a restocking fee of £25 or 25% of the value (whichever is the lower) will be charged, but the administration fee will be waived.
- We warrant the goods for a period of 5 years for steel radiators, 10 years for stainless steel and aluminium radiators, 2 years for radiator electrical componentry and 3 years for extractor fans, from the date of delivery. The warranty is subject to correct installation to current standards/water treatments and use.
- Radiators with steel components (other than stainless steel) must not be installed on a domestic hot water circuit. If a stainless steel or brass product is to be installed on the domestic hot water circuit, a check should be made with the local water authority to ensure that dezincification is not a common occurrence.
- Artificially softened water should not be used to fill radiators. For FAQ radiator/water-related information, visit www.fernox.com.
- All measurements given in this brochure are nominal dimensions only.
- All brochures, catalogues and other promotional materials are to be treated as illustrative only. Their contents form no part
  of any contract between us and you should not rely on them in entering into any contract with us. Any typographical, clerical
  or other error or omission in any literature, quotation, price list, or other document issued by us will be subject to correction
  without liability being incurred by us.
- Orders for non-stock items such as made to measure and made to order (as identified as such in our brochure for Zehnder which was in circulation at the date you placed the relevant order) which we have accepted cannot be varied and/or cancelled once manufacturing has begun or special material and/or equipment has been ordered by us. Any variation with the order has to be communicated within 24 hours of the order acceptance.
- All VAT calculated at 20%

#### **Bathroom Zones**

The diagram below shows a bathroom divided into four clear zones: 0, 1, 2 and outside zones. Please note, the diagram is only a guide and is NOT to scale. Please refer to I.E.E Wiring Regulations (BS 7671:2008) for detailed information.

Zone 0: Inside the bath

Zone 1: Area above bath / shower tray to a height of 2.25m.

Minimum rating of IPX4 should be used unless water spray will be present. In this case, a rating of IPX5 should be used.

Zone 2: Area stretching 0.6m from zone 1. Minimum rating of IPX4 should be used here.

**Outside Zones:** No water spray is likely to be used here, therefore, no IP rating is required.

**IP Rating:** "X" denotes level security against dust particles. Second digit denotes level of "watertightness".

IPX5: Protected against low pressure water jets

IPX4: Protected against splashing water

### Frequently Asked Questions

#### Why is it important with some of the models that the flow is in a specific connection position?

Some of the design radiators have baffles inside the watercarrying tubes to divert the water flow around the whole radiator to maximize efficiency. Check the installation instructions to see if this applies to the radiator before it is installed.

## What is an inhibitor and why should it be used in a central heating system?

An inhibitor is a chemical mix that should be added to the central heating system water to prevent corrosion and to prolong the life of the system. When new or additional radiators are being installed, the system should be drained, cleaned and flushed in accordance with BS7593 and a good quality chemical water treatment inhibitor should be added to the heating system.

### Can steel and aluminium radiators be put on the same system?

Yes, as long as an inhibitor for mixed metal systems is used. In reality, most systems are already mixed metal, as many have aluminium heat exchangers in the boiler, plus copper pipes and steel radiators already installed.

### Why is it important to use dual energy installations correctly?

Simultaneous use of the electrical element and the central heating system should be avoided as this will shorten the life of the element and invalidate the warranty. Correct use is as follows: In summer when the central heating is switched off, vent the radiator to ensure there is no air present, then close the flow valve (only) and activate the immersion heater. In winter, de-activate the immersion heater and open the flow valve.

## What is the difference between outputs listed at $\Delta T60^{\circ}C$ and $\Delta T50^{\circ}C$ ?

 $\Delta$ T60°C allows for older boiler systems, whilst  $\Delta$ T50°C is the new European testing standard for modern boilers, such as condensing boilers, which have lower flow and return temperatures. Therefore, to avoid radiators being incorrectly sized, it is important to know the system's temperatures and take them into consideration.

## Making history. Shaping the future.

Since 1895

### 1895 Repairs of all kinds

The Zehnder family of entrepreneurs begins with Jakob Zehnder (born in 1855). He builds a house and small mechanical workshop in Gränichen, Switzerland.

## 1923

A light motorcycle conquers Switzerland The Zehnder brothers develop and sell the legendary "Zehnderli" light motorcycle.

**1912** The family-run company is born The J. Zehnder & Söhne company is founded by Jakob Zehnder and his three sons.

## 1930

1979

A leading European innovator

remains popular to this day.

Europe's first steel tube radiator The innovative Zehnder Charleston radiator, a design classic, establishes its place on the market.

Zehnder demonstrates its pioneering spirit once again by developing the first bathroom radiator – a product that

## 1964

Start of global expansion In view of growing competition in Germany, the Zehnder company decides to open its own dedicated production plant near Freiburg in Breisgau.

### 1980

Entry into radiant ceiling panel market Zehnder expands its portfolio to include radiant ceiling panels, which are ideal for heating industrial halls and commercial buildings.

### 1986 Listing on the Swiss stock market Zehnder goes public and lists its shares on the Zurich stock exchange. The family retains a majority share to this day.

## 1996

First production site in China Zehnder becomes the first foreign company to enter the Chinese radiator market.

### 2001 Move into the ventilation business

Zehnder joins the comfort ventilation business, an area that undergoes regular expansion in subsequent years.

### 2007 Industry in its sights

Zehnder establishes a fourth business field with air cleaning systems for industry, logistics and the food and beverage sectors.

### 2018 Zehnder Specification Centre opens

Located in the Business Design Centre in Angel, Islington, the centre showcases Zehnder's range of indoor climate solutions including radiant heating and cooling products, comfort ventilation systems and radiators.

### 2013 Opening of the logistics centre

Opening of the oglisuss centre Opening the Zehnder logistics centre in Lahr, Germany, provides a hub for European deliveries and is a huge step forward in developing the company's customer service activities.

Today A service provider and pioneer Zehnder is a leading global provider of comprehensive solutions designed to ensure a comfortable and healthy indoor climate, with a workforce of around 3500 employees.

Traffic White 9016 Gloss

### Explanation

These colours are finished with a gloss finish; all other colours are matt-finished.

Some colours and finishes are only available for selected products. Special colour shades on request. Despite extreme care in the production of this colour chart as well as in the painting process of our radiators, slight colour deviations, depending on the production series and compared to other colour carriers (ceramic, paper, metal ...) possible.
