Appliances to spark every cook's CREATIVITY

Built-in appliances that let passionate cooks express their individuality

As a leader in built-in appliances, we design precision-engineered, beautifully finished products that give home chefs the freedom to create a kitchen that reflects their taste and cooking style. Combining professional performance, seamless integration and customisable options, our range empowers people who love to cook to personalise every detail – from look to function – so their kitchen is as individual as their recipes.

A NEFF icon: Slide & Hide®

NEFF Slide & Hide® the first and only fully retracting oven door that disappears under the oven cavity to give unobstructed access to trays and pans. It combines smart, user-focused engineering with stylish German design: easy, safe handling, flexible cooking across styles and budgets, and seamless integration into a range of kitchen layouts.

NEFF is here for you every step of the way

NEFF positions itself as a brand that protects your purchase through meaningful warranties, reliable repair and parts services, highly rated customer care, and an engaged owner community.

Enhance your cooking with steam

Steam cooking preserves flavour, moisture and nutrients while often shortening cooking time, keeping vegetables vibrant and meats tender. It's versatile: gentle steam suits delicate foods and reheating; full steam cooks larger items quickly and helps retain vitamins; steam boosts improve oven spring and crust for breads. Other steam modes refresh food and prove dough for healthier, better baking.

Create a kitchen for every need

Our range of thoughtfully engineered appliances helps every cook get the best from their kitchen. Innovations like the Slide & Hide® oven give wheelchair users easier access for loading and checking dishes. NEFF Home Connect and smart features (remote, app and voice control) lets users operate appliances remotely. From induction hobs with built-in extraction to connected refrigeration, these appliances make cooking easier and more inclusive.

NEFF's iconic SLIDE & HIDE® DOOR

The iconic Slide & Hide®: the first and only fully retracting oven door. Only from NEFF.

What makes our Slide & Hide® ovens so special:

- Wide range of features suited to all cooking styles.
- Seals the food quickly making it ideal for multi-level cooking. A perfect choice for baking and roasting achieving succulent roasts and even bakes.
- The range includes an oven for every cooking style and budget. Designed using a value class to identify each collection.
 - Our N90 range is our most premium range followed by N70 and N50
 - For perfect design alignment the ranges have been curated to be installed vertically or horizontally within their own value class aligning and matching their fascia panels.
- Our Single Slide & Hide® ovens seamlessly integrate into various kitchen designs. They can be combined with other Single ovens side by side or with Compact ovens and warming drawers, both horizontally and vertically, offering versatility in design and cooking solutions.
 - One notable advantage is in an Accessible kitchen, where these appliances offer many benefits. They can be installed at a suitable height, and the retractable door provides full, safe access to the oven cavity.
- German design.

Steam cooking EXPLAINED

WHAT IS IT

VARIO STEAM®	INTENSIVE STEAM
Vario Steam® combines conventional hot air cooking functions with Steam.	Intensive Steam has all the functions of Vario Steam® combining hot air and steam.
Ducts in the back plate release steam into the oven quickly and evenly adding steam into the oven cavity.	It also uses 100% (pure) steam to gently cook a variety of dishes.
Vario Steam® has 3 levels of steam: <ul style="list-style-type: none"> • Level 1 (Low) Steam • Level 2 (Medium) Steam • Level 3 (High) Steam 	The Intensive Steam now means that the steam temperature will reach 120°C – by increasing the temperature it reduces the cooking times for certain foods.
Both steam approaches can be added to: <ul style="list-style-type: none"> • Circo Therm® • Top and Bottom Heat • Circo Roasting • Bread Baking Setting 	

Vario Steam® & Steam Boost

The difference between these two features is that with Vario Steam®, once the level of steam intensity is selected, the appliance automatically adds in the steam at selected intervals whereas with Steam Boost the steam is manually added by the user for a 3 minute duration, repeatable for up to another 9 times.

Vario Steam®

Vario Steam® has 3 levels suitable for:

- **Add Level 1 steam for pastries and cakes** - to give an even golden crust, better rise and volume. No soggy cakes here just beautifully moist.
- **Perfect roasted meats can be achieved by adding level 2 steam**, no basting, just a golden crisp skin with tender meat inside. Plus less shrinkage.
- **Add level 3 high steam to Circo Roasting 200°C** for easy **roasties**. No part boiling, a touch of olive oil for crisp and fluffy results.

Steam Boost

This feature is primarily for home-baked bread, giving a crisp outside and nice and fluffy on the inside:

- It delivers fast and intensive steam
- Oven is pre-heated
- A bread baking stone can be used
- Once to temperature press the Steam Boost* button to inject 3 mins of steam.
- This can be done up to 10 times during the programme.

* The feature is called Steam Boost but on the appliance fascia this is Steam Jet.

Intensive Steam (Full Steam)

Increasing the temperature reduces cooking times for produce that cooks more slowly, such as root vegetables, rice dishes and pulses. Cooking these food types more quickly has the added benefit of retaining more vitamins.

Key Benefits

- **Saves Time** – increasing to 120°C means it can reduce cooking times.
- **Healthier Way to cook** – more vitamins and nutrients retained due to quicker cooking time.
- **Defrost** – this programme introduces steam to the cavity to ensure frozen food does not dry out. Temperature range 30-60°C.

Other Steam Options

Steam Reheat

The steam-reheat function adds water vapour and gentle heat during reheating so food retains moisture and texture and tastes closer to freshly cooked. Unlike a microwave, which can dry food out or make textures uneven, steam-reheat keeps food juicy and preserves crispness – even bread can regain its crust – making it ideal for batch-cooked and ready meals. Temperature range: 80-180°C.

Dough Proving

Bread will prove quicker using this function than at room temperature. Temperature range 30-50°C.

Create a kitchen for your EVERY NEED

At NEFF, we pride ourselves on helping our customers achieve the best results in their kitchens.

Our appliances are designed to make a difference and enhance home cooking. With our broad appeal and unique features like Slide & Hide® ovens, which offer full access and cater to various needs, including wheelchair users, we aim to provide a solution for all cooks and kitchens.

To find out more about how NEFF helps make kitchens inclusive for everyone, scan here.

Innovation that makes your life easier

NEFF's Built-In Range includes options such as Induction hobs with Twist Pad® control, smart connectivity for hobs and hoods, and touch-to-open refrigeration and dishwashers.

NEFF enables everyone to maximise their cooking potential

By incorporating NEFF appliances into specially designed kitchen furniture, we support safe and independent living for individuals with specific needs. Accessible kitchens, with features like rise and fall worktops, benefit not only wheelchair users but also those in multi-generational homes, accommodating different cooking and preparation preferences. The NEFF range installed in Symphony's Freedom Kitchen demonstrates a collaboration for Accessible & Multigenerational kitchens. The images taken at the NEFF Showroom in Corby highlight how these two can work together.

Tactile markers for ease of use

Tactile markers on the hob help visually impaired users quickly and confidently locate cooking zones and controls, supporting independent use.

For fully integrated fridges, Door Open Assist lets a light nudge break the seal so heavy cabinet doors open easily.

Get more with NEFF HOME CONNECT

More time for your creativity and your guests.

Connections are important for NEFF and the connections that we make over food are our favourite ones. When we share a meal with family and friends, we share a connection around the table but sometimes we all need a little help. When you're in need of a little creative inspiration, having a partner in the kitchen can make those connections easier and stress free...

Home Connect

Perfect Partners

With food it's not always about the refined presentation – it's about the flavour, the joy and the pleasure those shared meals bring. Stay better connected with your guests with oven control and monitoring via smartphone or voice control. No more dashing back and forth to the kitchen – enjoy the benefits of our technology partnerships for perfect cooking results every time!

Looking for Inspiration?

Want to find a new way to cook something or have a lot of seasonal ingredients? Spend some time with our recipe partners on NEFF Home Connect and be inspired by others!

Got your hands full creating your next dish?

Achieving perfect results has never been easier with Oven Assistant – simply use the NEFF Home Connect app or ask Alexa to find the perfect setting for your dish.

Sharing Favourites

We all have our favourite recipes, the ones that connect us, make us feel nostalgic and the ones that keep us at the table until the last morsel has been enjoyed. Let your oven in on the secret – share oven settings for your favourite recipe for quick, convenient access and it'll be ready to go whenever you feel inspired!

NEFF is here for you EVERY STEP OF THE WAY

We are fully committed to providing excellent customer service and support. Our dedicated team of engineers is available to assist you with product advice, spare parts, accessories, and repairs. We aim to resolve your issues on the same day of the service visit. Our exceptional service has been recognized by the industry with the TEQ Award for 10 consecutive years. Additionally, we have received positive reviews on TrustPilot, earning us an excellent rating of 4.7.*

4.7
Score as of February 2026

NEFF Warranties

Our support includes a comprehensive range of warranties, with 2 years of warranty on all appliances as the standard, and some models offering a 5-year warranty*. We also provide product and category warranties for Refrigeration, Dish, and Laundry, ensuring peace of mind for our customers.

All NEFF home appliances come complete with a 2 years warranty as standard to protect against any manufacturing or material faults during this period.

For a limited time only, selected NEFF home appliances come with a free 5 years warranty. Offer applies to selected NEFF models purchased between 01.04.26 - 31.03.27 and registered within 3 months of purchase.

This 10 years warranty covers the Compressor Drive motor only on selected NEFF refrigeration appliances.

This 10 years warranty protects against rust in the inner cavity of NEFF dishwashers. Valid on all NEFF dishwashers purchased from 01.01.2012

This 10 years warranty protects the motor on your washing machine, ensuring it runs as efficiently as possible.

This lifetime warranty protects against water damage caused by a defective Aqua Stop system. Valid on all NEFF washing machines and NEFF dishwashers with an Aqua Stop system.

*To check if your product qualifies, please see our website or call us. Contact details available on pages 262-263.

Support And Product Advice

Prefer to go online? You can visit our support content at: neff-home.com/uk/service/support to quickly find the help you need. We cover questions about usage and maintenance of your appliance, as well as tips on getting started and installing your new appliances. You'll also be able to access your user manual at any time.

The NEFF OVEN RANGE

NEFF's overall range gives customers two levels of choice – Core Range & Flex Design.

Graphite Grey

Stainless Steel

Flex Design Range

Introduced in 2023, the Flex Design Range extends the N90/N70 feature set to ovens, hobs and hoods while adding a higher level of design customisation: appliances can be finished in four coordinated colours (Brushed Bronze, Deep Black, Anthracite Grey and Metallic Silver) so they can better match the kitchen.

FLEX DESIGN

Throughout the brochure the majority of the range is Core but where there is a Flex Design option available it is clearly indicated as there is an additional ordering process to follow to complete the appliance.

Brushed Bronze

Anthracite Grey

Metallic Silver

Deep Black

NEFF Oven Range 2026

An oven for EVERY COOK and kitchen

Appliances tailored to you - customise your range on cooking function, design & user interface

FLEX DESIGN

For complete personalisation

Personalise your oven appliances with easily interchangeable Flex Design Trim, available in four distinctive colours, to coordinate with the design of your kitchen.

Comes with 5 year warranty.

Key Functions Guide

Cooking Functions

CIRCO THERM®

Circo Therm® evenly distributes the hot air throughout the oven, allowing for consistent cooking results on multiple trays simultaneously.

CIRCO ROASTING

Circo Roasting is the ideal function for cooking meat and poultry. The circulating hot air helps to sear the exterior of the meat quickly, locking in juices and flavour while creating a crispy, golden-brown crust. Meanwhile, the interior remains moist and tender.

TOP/BOTTOM HEAT

Providing conventional cooking heat sources at the top and bottom of the oven. Heat travels to the centre of the oven by natural conduction. Ideal for baking pastries and scones.

CENTRE SURFACE GRILL

When the Centre Surface Grill function is activated, only the centre grilling elements will heat up. Ideal for when cooking smaller quantities.

LOW TEMPERATURE COOKING

A special setting for hob-sealed prime cuts of meat and poultry. Meat/poultry is placed in a pre-heated dish and transferred into the oven. The low temperature setting uses a fixed temperature to gently tenderise without overcooking, resulting in meat/poultry that is juicy and melts in the mouth.

BREAD BAKING

Bread baking temperature varies between 180°C and 220°C. Ideally suited to baking crusty bread with an open texture. Up to three levels of bread can be baked at the same time.

KEEP WARM

An ideal setting for keeping food warm without drying it out before serving. Typically set between 66°C to 100°C.

Special Features

NEFF Home Connect

Control your oven directly from a smartphone or voice assistant. You can also download updates and additional functions.

BAKING AND ROASTING ASSISTANT

Baking & Roasting Assistant helps you to cook meals with ease, by simply selecting pre-selected food items from the Bake & Roast Assist menu. Select your meal on the display and you will find a suggested temperature & cooking time. For Baking, Roasting & Grilling the entire process gives perfect cooking results.

CIRCO THERM® GENTLE

Circo Therm® Gentle is designed for delicate cooking tasks that require gentle heat and precise temperature control. Operating at a lower temperature, it is perfect for baking delicate pastries, or slow cooking.

CIRCO THERM® INTENSIVE

Uses a combination of Circo Therm® and bottom heat, ideal for foods that need a crispy underside like pizzas or specialty breads. It can also be used for one stage pastry such as lemon meringue pie, eliminating the need for blind baking.

BOTTOM HEAT

Providing heat from the bottom of the oven, this method is ideal for pizza bases and pastry cases to create a crispy underside or for bain marie and casseroles.

FULL SURFACE GRILL

The grill element is situated in the oven roof. It is thermostatically controlled and will cycle on and off to maintain the required temperature.

AIR FRY

The convenience of an Air Fryer inside the oven. This feature uses the grill and fan to create the same results. Using our Air Fryer and Grill Tray (Z1655CA0) further helps the air to circulate achieving optimum results.

DOUGH PROVING

The Dough Proving function provides a controlled environment with a low and consistent temperature ideal for proofing dough. This feature offers home bakers a convenient and reliable way to proof dough, ensuring consistent results and saving time in the bread making process.

PLATE WARMING

Hot air is circulated at up to 65°C to safely warm plates and service dishes in preparation for dinner.

MEAT PROBE

The Multi Point Meat Probe measures the joint's heat at three points ensuring the right core temperature is reached, so you can take the roast out when it's ready.

Cooking Functions With Steam

VARIO STEAM®

Vario Steam® enhances the cooking process by introducing controlled bursts of steam into the oven. Whether you're baking bread, roasting meats, or reheating leftovers, dishes come out with more intense flavour and an appetising appearance.

REHEAT

Reheat allows you to gently warm dishes again – and thanks to the moisture in the oven, they will look and taste freshly prepared.

INTENSIVE STEAM (FULL STEAM)

Make your favourite dishes healthier with our Intensive steam function. Gently cook your dishes at up to 120°C, to preserve their natural flavour and lock in nutrients. It's easy to operate and also simple to refill the one litre water container – press a button to open the front panel, remove the container, fill it and you're ready to steam ahead.

Oven Cleaning Functions

PYROLYTIC SELF-CLEANING

Pyrolytic cleaning is a self-cleaning system for ovens. The process superheats the oven to approximately 485°C, which burns off any deposits from baking, roasting and grilling. This creates a perfectly clean oven and a residue of fine dust that's easily removed with a damp cloth.

OVEN CLEANING

A special electronic setting designed to keep EcoClean® surfaces inside the oven as clean as possible. Used on a regular basis, it can keep the oven's interior lining remarkably clean with minimal maintenance required.

BASE CLEAN

Base Clean helps clean the bottom of the oven by softening dirt with warm water. After the programme has finished you just have to wipe the base with a damp cloth.

DRYING FUNCTION

Dries the cooking compartment after a steam function.

EASY CLEAN®

For a lightly soiled oven, put approximately 400ml of water and a drop of washing-up liquid in the base pan and then select the EasyClean® programme. It softens baked-on residue so you can just wipe it down, for fast and uncomplicated oven cleaning.

DESCALING

All NEFF steam appliances contain a descaling programme which can be set according to the hardness of the water.

ECO CLEAN

Eco Clean is a microfine ceramic bead coating on the oven's interior back, top or sides, depending on the model. It has a very large surface area, making it extremely absorbent. It absorbs fat droplets and keeps the inside of the oven clean.

AUTOMATIC SAFETY SWITCH OFF

For electronic ovens only, this feature will automatically cut in if no changes to the settings on the appliance have been made in a long time, giving you complete peace of mind.

Temperature range	Automatic switch off after
Under 140°C	73 hours
141 – 200°C	6 hours
201 – 250°C	3 hours
251°C	2 hours

1 Measured according the EN50304, 65/2014. 2 For further information on inverter technology, please go to www.neffhome.com/uk/. 3For Inverter models, the maximum setting offers a time limited boost option for heating liquids. To ensure optimal results and to protect the appliance, the microwave power output is reduced in stages over the first few minutes down to the next power level (600W). After a cooling period, the microwave boost option will be available once more.

N90 Full Touch 3 Single & Coffee Machine

- Electronic, 6.8" Premium Full Touch TFT Display on all models. The only appliance in the range to have this size screen.

45CM COFFEE CENTRE CL4TT11G0 | N90

- Multiple international coffee variations
- Strength and aroma management
- Left hinged door
- Graphite Grey
- Not possible to seamlessly combine this appliance

¹ Measured according to the EN50304, 65/2014. ² For further information on inverter technology, please go to www.neffhome.com/uk. ³ For inverter models, the maximum setting offers a time limited boost option for heating liquids. To ensure optimal results and to protect the appliance, the microwave power output is reduced in stages over the first few minutes down to the next power level (600W). After a cooling period, the microwave boost option will be available once more.

Wireless MultiPoint Meatprobe

- Four sensors measure the foods core temperature for ultra precise cooking.
- NEFF Home Connect App lets you know when your desired doneness level has been reached.
- The wireless meat probe turns on when it is connected to your NEFF oven via NEFF Home Connect. Once the desired temperature is detected, the probe will send a signal to the oven, causing it to switch off automatically.
- Use it in your oven, on your hob, or outside on your grill.

Finish	Stainless steel
Dishwasher Safe	•
Suitable for steaming	•

1 Measured according to the EN50304, 65/2014. 2 For further information on inverter technology, please go to www.neffhome.com/uk. 3 For Inverter models, the maximum setting offers a time limited boost option for heating liquids. To ensure optimal results and to protect the appliance, the microwave power output is reduced in stages over the first few minutes down to the next power level (600W). After a cooling period, the microwave boost option will be available once more.

Create a sleek and stylish finish with Seamless Combinations

NEFF allows you the freedom to choose the appliances that suit your cooking style – and when it comes to design within our N90 & N70 Slide & Hide® 60cm single ovens and the majority of our 45cm compact ovens you can install a seamless look.

N90 and N70 Graphite Grey

Seamless Combination® strips – Z11SZ60G0
For 45cm Compact Oven with 14cm Warming Drawer

Seamless Combination® strips – Z11SZ80G0
For 60cm Single Slide & Hide® Oven with 29cm Warming Drawer

Seamless Combination® strips – Z11SZ90G1
For 60cm Single Slide & Hide® Oven with 45cm Compact Oven (special aperture applies)

Black Cosmetic Decor strip – Z13CV06S0
For use between 60cm single and 45cm compact ovens

Compact Oven – C24MS71G0B
Compact Pyrolytic Oven with Microwave and a Full Touch 2 display

Warming Drawer – N24HA11G1B
N70 / N90

Single Oven – B64VS71G0B
Slide & Hide® Single Oven with Pyrolytic, Vario Steam® and a Full Touch 2 display

Warming Drawer – N34HA11G1B
Warming Drawer N90 / N70

Compact Oven – C24MS31G0B
Compact Steam Oven with Intensive Steam and a Full Touch 2 display

Single Oven – B64FS31G0B
Slide & Hide® Single Oven with Intensive Steam and a Full Touch 2 display

Mix and match your appliances

You can combine single ovens with a Slide & Hide® door in the N90 & N70 range.

It is not possible to seamlessly combine any models in this value class with a drop-down door. It is also not possible to combine the N50 range seamlessly – this is due to where the fixing points are on the appliance.

The N90 & N70 Range combinations, illustrated below, are:

- 45cm Compact oven* with a 14cm warming drawer.
- 60cm Single Slide & Hide® oven with a 29cm warming drawer.
- 45cm Compact oven* with a 60cm Single Slide & Hide® oven.
- Possible in Graphite Grey & Stainless Steel trim colour.

* This cannot be done on the following C24GR3XG1B or CL4T11G0.

N70 Stainless Steel

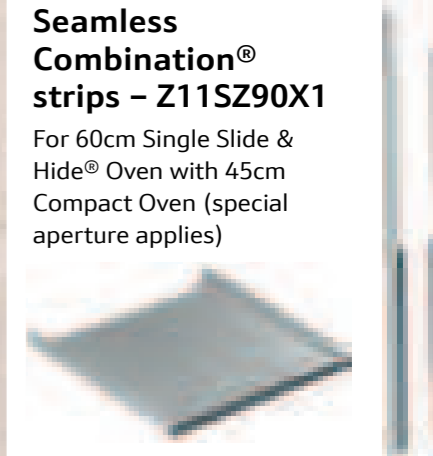

Seamless Combination® strips – Z11SZ60X0
For 45cm Compact Oven with 14cm Warming Drawer

Seamless Combination® strips – Z11SZ80X1
For 60cm Single Slide & Hide® Oven with 29cm Warming Drawer

Seamless Combination® strips – Z11SZ90X1
For 60cm Single Slide & Hide® Oven with 45cm Compact Oven (special aperture applies)

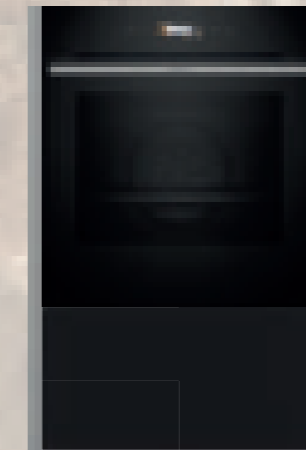

Compact Oven – C24MR21N0B
Compact Oven with Microwave and a Full Touch 1 display

Warming Drawer – N24HA11N1B
Warming Drawer N70 / N90

Single Oven – B54CR31N0B
Single Oven with a Full Touch 1 display

Warming Drawer – N34HA11N1B
Warming Drawer N90 / N70

Compact Oven – C24MR21N0B
Compact Oven with Microwave and a Full Touch 1 display

Single Oven – B54CR71N0B

THE NEFF OVEN COLLECTIONS

HOBS

VENTILATION

REFRIGERATION

DISHWASHING

LAUNDRY

Open for FLEXIBILITY

Our first kitchen series that's as unique as you are.

At NEFF, we believe that openness is the key to everything creative. It's a mindset that we share with other open-minded and free-spirited hobby chefs and food lovers all around the world. People with an insatiable appetite for the extraordinary, and a constant craving for the unconventional – in and outside the kitchen. People that would always choose individuality over conformity.

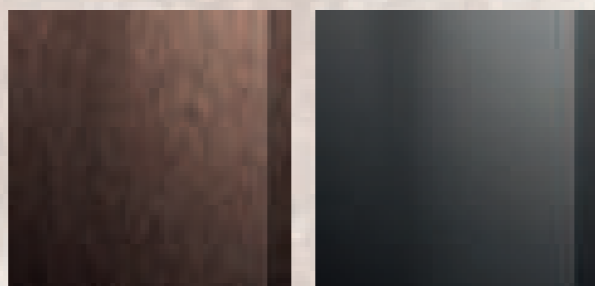

- 1 Seamlessly combine a Compact Oven and a Single Oven with our 105cm Seamless Combination trim.
- 2 The new NEFF Flex Design trim allows you to add the accent trim to the Angled Glass Chimney hood, extending the accent colour across the kitchen.
- 3 Introducing the Twist Pad Flex® to accent the colour on the Induction Hob control. On selected models the Twist Pad Flex® can also be used to control the oven.
- 4 The NEFF Flex trim can also be added as a side strip to the Induction Hob to further complement the range.

Open for PERSONALISED STYLE

Flex Trim finishes

It's details that make us special. Individual. Unmistakable. We believe your kitchen should be, too. That's why we've made it possible to personalise your appliances with the new NEFF Flex Design: interchangeable design elements such as handles and side trims in four distinctive colours for your oven, hood, hob, coffee machine and even your Twist Pad Flex®. Look forward to a Deep Black, Brushed Bronze, Metallic Silver or Anthracite Grey. And because kitchens grow and tastes change, the choice is also flexible. Simply swap out the design elements to suit your new style giving each appliance a lifetime of great taste.

Brushed Bronze

Anthracite Grey

Metallic Silver

Deep Black

Easy to install

With Flex Design change is really easy: you can simply swap out design elements on your own, anytime you want to fit your new style.

Scan this code to view a video to see how to install and change the Flex Design trims.

Throughout this brochure we have used the Brushed Bronze images – follow this link to our webpage to see the other colours brought to life online.

Flex Design Oven Range

For perfect alignment with your oven, horizontally or vertically, choose appliances from the same range – Flex Design or Core Range.

All single ovens have:

- Slide and Hide® with Soft Open / Close door and rotating handle*
- 1 pair Telescopic Rails
- Circo Therm®
- NEFF Home Connect

All compact ovens have:

- Soft Open / Close door
- 1 pair Telescopic Rails
- NEFF Home Connect

All microwaves have:

- Up to 900w
- 5 power levels

* Code Change B69FS3CY2A September 2026
* Change will be from Eco Clean to new Intensive Steam Clean

1 Measured according to the EN50304, 65/2014. 2 For further information on inverter technology, please go to www.neffhome.com/uk. 3 For Inverter models, the maximum setting offers a time limited boost option for heating liquids. To ensure optimal results and to protect the appliance, the microwave power output is reduced in stages over the first few minutes down to the next power level (600W). After a cooling period, the microwave boost option will be available once more.

How to order with FLEX DESIGN

Our introduction to Flex Design within the NEFF Collection has tried to inspire you with all the possibilities that this new NEFF Collection brings you.

The ability to customise appliances to your customers' needs while offering all the fantastic features and functions that NEFF delivers. The following chapters focus on the detail of how exactly you go about ordering and installing these appliances.

Customise to your style

Customising your appliance to match your kitchen is a concept that allows you to match oven trims and selected surface cooking and hoods to match the colours in the kitchen. Every appliance detailed in the next section is available in all four Flex Design trims.

Brushed Bronze

Anthracite Grey

Metallic Silver

Deep Black

Perfect alignment

Perfect alignment horizontally and vertically

The range has been considered to give perfect alignment across the value classes and all configurations are available in every colour.

Single appliance

Seamless Combination

Step-by-step approach to ordering

Whether you are ordering a single appliance or a suite of appliances to seamlessly combine vertically and horizontally, the following section will guide you through the process.

- If ordering single appliances, our step-by-step guide details the ordering process.
- If ordering multiple appliances to combine seamlessly, this process is also detailed.
- The guide navigates you, in a clear way, through the model codes to include when ordering.
- At the end of the seamless combination section we have included furniture installation guides.
- Further details on installation and colours can be seen by scanning our QR code where we will host videos online.

To make the ordering of the Flex Design range easy, this page shows the stages in ordering a single appliance or a suite of appliances to install seamlessly. The follow pages are an extensive guide with codes and installation apertures for furniture.

The way the concept works – single appliance

Our Flex Design concept is designed to build the appliance to the individual design requirement. The appliance is “blank” – choose the appliance you want to specify and then add the Flex Design trims in the chosen colour to create the final product. The Flex Design trim includes the handle and the side trim to the personalised colour required.

Follow the three easy steps below to configure your desired single appliance. ¹

Flex Design Trim is available in four distinctive colours.

	STEP 1 CHOOSE YOUR APPLIANCE	STEP 2 CHOOSE YOUR FLEX DESIGN TRIM	STEP 3 YOUR COMPLETE SET READY TO INSTALL
N90 FULL TOUCH 3 – 6.8" DISPLAY APPLIANCES	<p>Full Touch 3 appliance operates as a Full Touch interface. An optional one or two Twist Pad Flex® can be added to enable dial control. See page 17 for more details.</p> <p>Blank Appliance Model Number: B69VY7MY0</p>	<p>Flex Design Trim Model Numbers: Z9060BY0 + Z9801TWBY0 Twist Pad Flex®</p>	<p>Complete Appliance Model Numbers: B69VY7MY0 + Z9060BY0 + Z9801TWBY0</p>
N90 FULL TOUCH 2 – 4.1" DISPLAY AND N70 FULL TOUCH 1 – 3.7" DISPLAY APPLIANCES	<p>Blank Appliance Model Number: B69FS5CY0A</p>	<p>Flex Design Trim Model Number: Z9060BY0</p>	<p>Complete Appliance Model Numbers: B69FS5CY0A + Z9060BY0</p>

¹ Twist Pad Flex® is an additional accessory for N90 Full Touch 3 display appliances only.

The way the concept works – combining multiple appliances

Consideration has been made when installing the appliances seamlessly and the NEFF Collection Range of Flex Design appliances allows for more freedom when combining appliances. In the same way as choosing a single appliance, when you want to combine them the process is the same but you need to find the right installation trim that matches your combination (see variations on pages 76-77).

Configure your desired seamless combination following the three easy steps below. Some combinations require additional installation accessories fully detailed in this section.

	STEP 1 CHOOSE YOUR APPLIANCES AND INSTALLATION COMBINATION	STEP 2 CHOOSE FLEX TRIM AND ACCESSORIES	STEP 3 YOUR COMPLETE SET READY TO INSTALL
N90 FULL TOUCH 3 – 6.8" DISPLAY APPLIANCES	<p>Blank Appliances Model Numbers: B69FY5CX0 + C29MY7MY0 + N29HA11Y1B</p>	<p>Flex Design Trim Model Numbers: 2 x Z9801TWBY0 Twist Pad Flex® + Z912BBY0 + *Z166CAX0 ²</p>	<p>Complete Appliance Model Numbers: B69FY5CX0 + C29MY7MY0 + N29HA11Y1B + 2 x Z9801TWBY0 + Z912BBY0 + *Z166CAX0 ²</p>
N90 FULL TOUCH 2 – 4.1" DISPLAY AND N70 FULL TOUCH 1 – 3.7" DISPLAY APPLIANCES	<p>Blank Appliances Model Numbers: B69FS5CY0A + C29FS3AY0 + N29HA11Y1B</p>	<p>Flex Design Trim Model Numbers: Z912BBY0 + *Z166CAX0 ²</p>	<p>Complete Appliance Model Numbers: B69FS5CY0A + C29FS3AY0 + N29HA11Y1B + Z912BBY0 + *Z166CAX0 ²</p>

¹ Appliance examples shown with Brushed Bronze Flex Design Trim.

² The Intermediate platform is required when installing an oven on top of another oven and is a Required Accessory.

The seamless combination FAMILY

The NEFF Flex Design range is not only available in four distinctive colours but the new seamless combination strips are available in seven lengths to allow for the ultimate in personalised installation solutions. Perfect when curating solutions, with a beautiful design aesthetic. These sizes allow for new combinations: stack a compact and a microwave, a single oven and a small warming drawer, or even two single ovens in a tall bank – the flexibility on installations has so many more possibilities.

There are 7 stackable sizes and within each you can have a variety of combinations to suit your cooking style.

i Twist Pad Flex® is an additional accessory for N90 Full Touch 3 display appliances only.

Your Guide To Cooking Seamless Combination Flex Design

The Flex Design range of Seamless Combination strips means there are many more ways to combine appliances. There are 7 strips and for some of the strips there are several combinations available. This following section includes the detail required to install every combination available.

Once a combination has been decided with the customer, this guide will navigate you through the aperture that this size will fit (line drawings and installation follow this section). For each combination we have included the guide to ordering.

Once you have decided what to combine and the installation you would like - find the illustrated example and choose the appliances - detailed alongside the illustration. Then choose the Flex Design trim in the chosen colour - each trim is configured with the correct amount of side trims and handles.

When the installation involves stacking an oven on another oven or compact oven, you require an intermediate shelf - code supplied. Finally if on selected Full Touch 3 models you want to add an optional Twist Pad Flex® then the codes are available.

NEFF HOB

Range

The right hob for every cook, in every kitchen

Cooking and kitchen design are personal, which is why NEFF provides hobs to fit every preference, shape and size of kitchen.

Electric or gas? The choice is yours

Cooking and kitchen design are all about creativity and individual taste. NEFF has a range of hobs to suit any cooking style or kitchen design.

- **NEFF Electric Hobs**
 - Venting Hobs – available in 80cm, 70cm and 60cm sizes, Black Glass or Matt Black finishes.
 - Flex Induction Hobs – available in 90cm, 80cm and 60cm sizes, Black Glass or Matt Black finishes.
 - Induction Hobs – available in 80cm and 60cm sizes, all finished in black glass.
 - Ceramic Hobs – available 60cm size.
- **NEFF Gas Hobs** – available in 90cm, 75cm and 60cm sizes, Black Glass or Stainless Steel finishes.

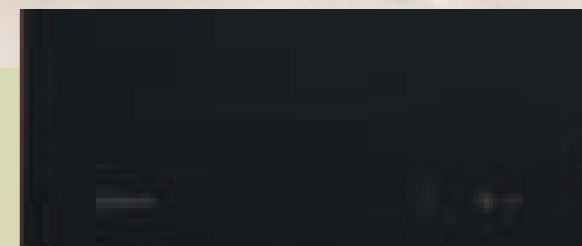

Matt Black design is here!

Interior design trends are moving towards matt surfaces. This is also increasingly the case in the kitchen. Our approach at NEFF is to let you decide how your kitchen appliances fit into the overall picture. Whether you want them to take a backseat or centre stage. We truly follow the motto *"Your kitchen, your colour, your style!"*

Your kitchen, your colour, your style!

Available in new matt black glass, glossy black glass or stainless steel, NEFF hobs bring considered materials and clean lines to any kitchen. Choose the iconic TwistPad®, the Virtual TwistPad® with highly intuitive touch control, or precise gas cooking with Flame Select – the precision cook's favourite.

NEW Matt Black

Black Glass

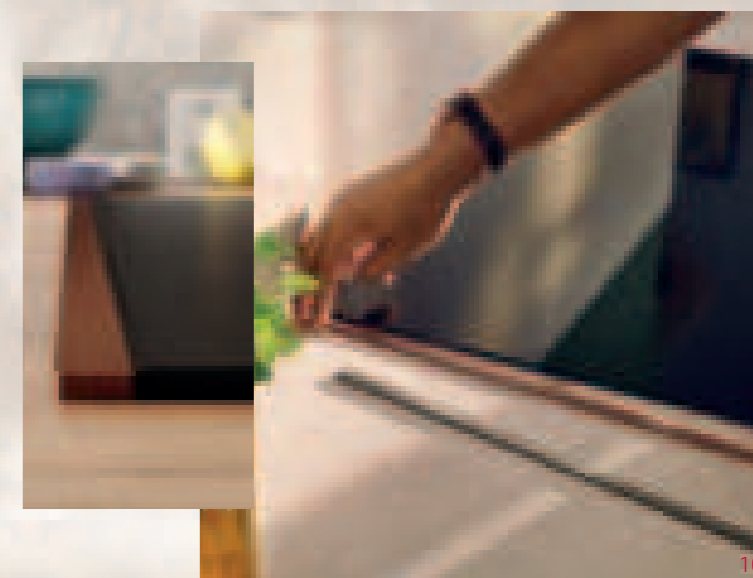

Stainless Steel

Open for individual style with Flex Design

Create a harmonious kitchen with NEFF's Flex Design range allowing you to have a matching design theme across your cooking space. With four stunning finishes to choose from you can redesign your kitchen without replacing your appliances by just changing the finishing strips.

Your Guide To Hobs

Rethink cooking in NEFF's infinite kitchen

A great meal is all about the ingredients and cooking process. And it's the same when it comes to choosing the right hob. If you want flexibility, an electric Flex Induction hob might be what you're after. Or reclaim your space in the kitchen with our Venting Hob. With integrated ventilation you can install your hob on a kitchen island to create a sociable space when cooking. There's a NEFF hob for everyone to get creative with.

Induction Hobs

- If sleek, stylish and clean lines are more in keeping with your kitchen design, our Induction hobs provide a minimalistic and premium look whilst providing a quick and responsive cooking surface.
- Cooking with an Induction Hob saves energy and is incredibly safe – there is little residual heat once the saucepan is removed from the hob.

- **Available in 80cm and 60cm**
- **Available in Black Glass**

Featured model:
T56FHS1L0 N70 60cm Induction Hob Twist Touch® Control

Venting Hobs

- The 2-in-1 Hob and Hood is here. With freedom from a conventional wall or island hood, our integrated cooktop ventilation allows you to reclaim your space in the kitchen. The NEFF Venting Hob is set to create the stylish and sociable kitchen you've always dreamt of.
- Our Venting Hobs offer maximum flexibility in installation options - Unducted, Partly Ducted, Fully Ducted & Ducted out.

- **Available in 80cm, 70cm and 60cm**
- **Available in 2 surface finishes - Black Glass and Matt Black**
- **Available in Core and 4 Flex Design finishes**

Featured model:
V68YYX4B0 N90 80cm Venting Hob with Twist Touch® Control

Ceramic Hobs

- With their frameless design, our Ceramic hobs stand out in any kitchen, and a whole range of options with up to 17 power settings makes preparing the next feast as easy as pie.
- Better still, our enhanced touch control panel provides full flexibility over your cooking.

- **Available in 60cm**
- **Available in Black Glass**

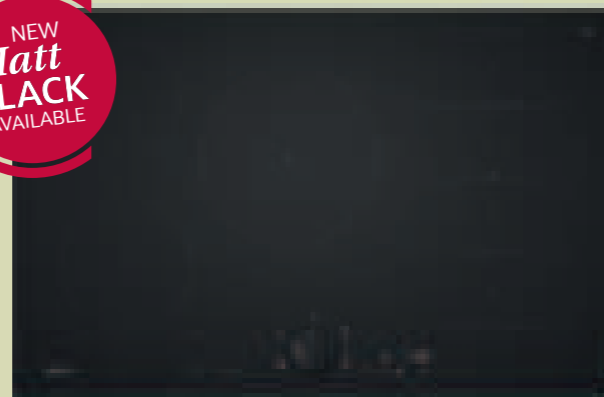

Featured model:
T16NBE1L N50 60cm Ceramic Hob

Flex Induction Hobs

- For sociable cooks who often find themselves juggling multiple pans, a Flex Induction hob provides any size pan, anywhere cooking within the zones.
- When the zones are activated, pans will receive instant, even and rapid heat transference wherever they are placed. Our range of Flex Induction hobs are available with a number of controls either with Twist Touch® control or using a NEFF Anthracite Grey Twist Pad®.

- **Available in 90cm, 80cm and 60cm**
- **Available in 2 surface finishes - Black Glass and Matt Black**
- **Available in Core and 4 Flex Design finishes**

Featured model:
T68NUV4A0 N90 80cm Flex induction hob with Anthracite Grey Twist Pad®

Gas Hobs

- For traditionalists who prefer to see exactly how much heat is delivered to their pans, gas cooking provides a robust and reliable way to prepare your favourite dishes.
- You can control your hob by numbers and not by eye with our precise and responsive Flame Select® heat control feature, available across selected gas hobs.

- **Available in 90cm, 75cm and 60cm**
- **Available in 2 surface finishes - Black Tempered Glass & Stainless Steel**

Featured model:
T27PIQ450 N70 75cm Gas Hob

The all new MATT BLACK DESIGN

What speaks in FAVOUR OF MATT BLACK?

Design choice

A deep, true black with an understated presence that blends seamlessly into your kitchen. The user interface remains bright and crisp for effortless control.

Easy to clean

Fingerprints and smudges are far less visible than on glossy finishes, and wiping leaves no streaks – cleaning is quicker and simpler.

Less visible scratches

The matt surface masks light wear and scratches, preserving a pure, long-lasting look.

Less
finger-
prints

Less visible
scratches*

Easy
to clean.
Bye bye
streaks!

Practical performance PURIST DESIGN

Interior design trends are moving towards matt surfaces. This is also increasingly the case in the kitchen. Our approach at NEFF is to let you decide how your kitchen appliances fit into the overall picture. Whether you want them to take a backseat or centre stage. We truly follow the motto

“Your kitchen, your colour, your style!”

Glass Draft Hoods Flex Design

Seamless Hob Installation

Celebrate your kitchen design with visual unity. Our Glass Draft Hood has been designed to be installed seamlessly with any of our Flex Design hobs in the corresponding 90cm or 80cm width.

Ordering Flex Design

The process is defined within the brochure. For all Flex Design hobs the trim size is the same.

If combining the Flex Design hob with a Flex Design Glass Draft hood, please follow the detailed instructions on pages 122-123.

Open for fresh designs

The Flex Design hobs in this range can be customised with a choice of four side trims and coordinating Twist Pad Flex®. Simply choose the trim colour at the time of ordering.

General Features

COMBI INDUCTION

2 individual induction cooking zones can be combined to 1 large zone with even heat distribution.

COMBI ZONE

The Combi Zone allows you to combine two adjacent cooking zones into a single, larger zone. This flexibility enables the use of larger cookware or multiple pots and pans simultaneously, accommodating various cooking needs.

EXTENDED FRYING SENSOR

The sensor automatically adjusts the heat to the pan to maintain an even temperature. This control allows you to cook all dishes to perfection as it maintains a consistent heat preventing overcooking or burning.

TOUCH CONTROL

Simply select a zone then swipe your finger across the control panel to select a heat mode.

POWER BOOST

More heat when you need it. Power Boost is our smart, time-saving cooking hack. Want to boil your pasta water in a flash? Simply activate Power Boost to heat it much faster. Get a flexible boost for your dishes.

POWER TRANSFER

Move your pots, not your focus. Power Transfer recognizes the heat level and size of your pot, automatically transferring these settings to the new location when you move it. No more pushing and adjusting, a gentle tap is enough to confirm, keeping your focus on the essence of cooking – your intuition.

TWIST TOUCH®

Direct interaction with a twist of your finger. Twist Touch® control lets you select everything with the tip of your finger. Choose your desired cooking zone or select your preferred power level – cooking the easy way.

POWER MOVE

With Power Move, you have the flexibility to move pots and pans between two or three heating zones to accommodate various cooking needs.

ANTHRACITE GREY TWIST PAD®

The Anthracite Grey Twist Pad® allows you to precisely adjust the heating degree of pots, frying pans and grills with just one finger touch. Simply touch the Anthracite Grey Twist Pad® lightly to activate the desired cooking zone, then rotate to select the desired power level. The magnetic Anthracite Grey Twist Pad® is removable and ready to transform your hob into a creative and easy-to-clean hotspot!

FLEX INDUCTION

Flex Induction allows for flexibility with cooking by having larger cooking zones which automatically detect the size of the pans. This means you can use larger cookware like griddle plates or large casserole dishes with even heat distribution.

NEFF Home Connect Features

NEFF HOME CONNECT

Control your hob easily from your smartphone or voice assistant when connected with the NEFF Home Connect app.

FAVOURITE BUTTON

Personalise your hob according to your preferences: using NEFF Home Connect you can add your favourite functions to your hob and operate them directly via the Favourite Button in the user interface. This allows you to switch the hood lights on or off with ease from your hob or combine different settings to easily cook your everyday dishes at a glance.

HOB-HOOD CONTROL

Our Hob-Hood Control is a convenient feature that creates real cooking comfort. When you start your hob, your hood will turn on automatically. To do so, simply pair your hob and hood with the NEFF Home Connect app.

Safety Features

RESIDUAL HEAT INDICATOR

The moment you turn off your hob, the display offers a clever safety function, indicating which cooking zones are still hot or warm.

CONTROL PANEL LOCK

Prevents unintended activation of the hob.

SAFETY TIME SWITCH OFF

For safety reasons, heating stops after a preset time if not used. It is possible to customise this feature.

PAUSE

The Pause function allows you to easily pause the heating and block all buttons on your hob, giving you the flexibility to attend to other tasks while cooking. You can pause and then continue cooking within the next 10 minutes.

Style, Control, Choice – NEFF Electric Hobs Range at a glance

Choosing the right Electric Hob for you

NEFF offers intuitive controls and precise heating to suit every cook and kitchen layout.

For complete personalisation

Personalise your hob and hood with easily interchangeable Flex Design Trim, available in four distinctive colours, to coordinate with the design of your kitchen.

Flex Design Trim

All Flex Design Venting Hobs require a set of Flex Design side trims to be ordered. All trims are a standard size and available in all 4 colours.

Finish	Model Number
Anthracite Grey	Z90802PFAY0
Brushed Bronze	Z90802PFBY0
Deep Black	Z90802PFDY0
Metallic Silver	Z90802PFMY0

Twist Pad Flex®

To complete the Hob the choice of Twist Pad Flex® also needs to be ordered. Choose a side trim and Twist Pad Flex® in the desired colour.

Finish	Model Number
Anthracite Grey	Z9801TWAY0
Brushed Bronze	Z9801TWBY0
Deep Black	Z9801TWDY0
Metallic Silver	Z9801TWMY0

¹ Air flow and noise declarations made in line with CECEC Code Of Conduct. ²Measured according to EN61591 on largest pipe diameter. ³Sound power measured according to EN60704-3 on largest pipe diameter.

Venting Hobs

- Installed with energy efficient brushless motors that offer powerful but quiet performance.
- Can be installed in Recirculation or Ducted Out – 4 Ventilation solutions available.
- A larger Overflow container will hold up to 700ml and is integrated in the base of the appliance so will not impact on storage space below.
- To install in re-circulation mode no further components are required.

Venting Hob Installation Options

For the full range of installation accessories see page 132 of the Appliance Line Drawings.

UNDUCTED RECIRCULATION

Why use Unducted Recirculation

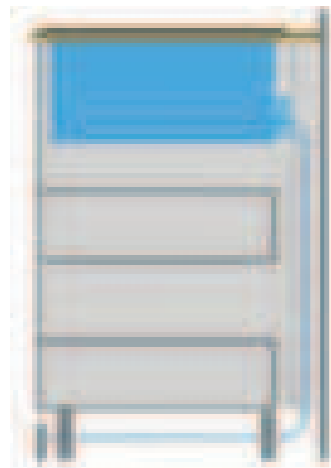

- Easy and quick to fit
- Less parts
- Cost effective

Requires no reduction in depth to the bottom two drawers and allows for more design flexibility, for example, floating islands.

Automatic run on of the extractor fan at min power level dries the filters and continues air flow through the service void, removing any potential moisture for extra safety.

Full Depth Drawers Possible

Installation considerations

What do I need?

- 4 x cleanAir filters and telescopic slider.
- These are supplied as standard with all inductionAir Plus appliances.

Good to know

- Telescopic slider ventilates air from the appliance into the service void. Max expansion of slider 80mm.
- Min requirement of service void 25mm, recommended 50mm min.

Important to note

- This option is NOT suitable for installations with non insulated walls.
- This is the ONLY installation type that uses the telescopic slider.

PARTLY DUCTED RECIRCULATION

Why use Partly Ducted Recirculation

Required when the distance from the back of the appliance to back of the base unit void is greater than 80mm.

Suitable for installations with non insulated walls or where damp has been an issue.

Maximum drawer depth 513mm with 70+cm worktop

Installation considerations

What do I need?

- 4 x cleanAir re-circulating filters. Supplied with appliance.
- Starter Kit 1 **Z861KR0** or 2 **Z861KR1** depending on the work surface depth.

Good to know

- Partly Ducted Recirculation takes the air down into the plinth and ventilates in through the plinth cavity.
- This requires greater depth work surface or reduced depth drawers.
- The 94mm ducting height cannot be changed to a slimmer version (reduces effectiveness) using an adaptor, as the 94mm space is still needed for the 90 degree turn from the horizontal to the vertical.

Important to note

- Starter Kits 1 and 2 provide all the required ducting and connectors for this mode of installation.
- The appliance may be fitted with another manufacturers ducting that has a rounded radius (please check compatibility before purchase). You will still need to purchase a **(Z821PD1)** diffuser.

FULLY DUCTED RECIRCULATION

Why use Fully Ducted Recirculation

Required when the distance from the back of the appliance to back of the base unit void is greater than 80mm.

Gives total peace of mind for non insulated walls or where damp has been an issue.

Maximum Drawer Depth 513mm with 70+cm worktop

Installation considerations

What do I need?

- 4 x cleanAir re-circulating filters. Supplied with appliance.
- Starter Kit 1 **Z861KR0** or 2 **Z861KR1** depending on the work surface depth
- To fully duct to the plinth an additional straight channel and a connector are required. A 500mm ducting section should be sufficient in most cases depending on worktop depth.

Good to know

- Full Recirculation kit takes air down through the plinth and out into the room via a plinth vent.
- This requires greater depth or reduced depth drawers.
- The 94mm ducting height cannot be changed to a slimmer version (reduces effectiveness) using an adaptor, as the 94mm space is still needed for the 90 degree turn from the horizontal to the vertical.

Important to note

- The appliance maybe fitted with another manufacturers ducting that has a rounded radius (please check compatibility before purchase). You will still need to purchase a **(Z821PD1)** diffuser.

DUCTED OUT EXTRACTION

Why use Ducted Out

Allows the removal of heat and moisture created by cooking, as well as grease and odour.

An improvement of extraction rate over recirculation modes* 615m³/h recirculation 622m³/h ducted out

*As per test parameters for the energy label declaration.

Maximum Drawer Depth 513mm with 70+ worktop

Installation considerations

What do I need?

- Starter Kit 3 **Z861KE1** (Includes 4 acoustic filters, radius bend, connector and 50cm straight channel).
- To complete your installation we can provide additional ducting lengths, connectors and adaptors.

Good to know

- It is also possible to use a fully ducted system, out of the kitchen.
- The acoustic filter kit is still required and is accessed the same way as the recirculation options.
- The Venting hob has been tested with a ducting run of 8 metres with 3 x 90 degree turns and maintaining efficient performance.
- We don't currently offer an external grid to go on the outside wall – this needs to be sourced independently.

Important to note

- The appliance maybe fitted with another manufacturers ducting that has a rounded radius (please check compatibility before purchase) You will still need to purchase **(Z811DU0)** x4 acoustic filters.

Venting Hobs

80CM V68FUX4L0

measurements in mm

measurements in mm

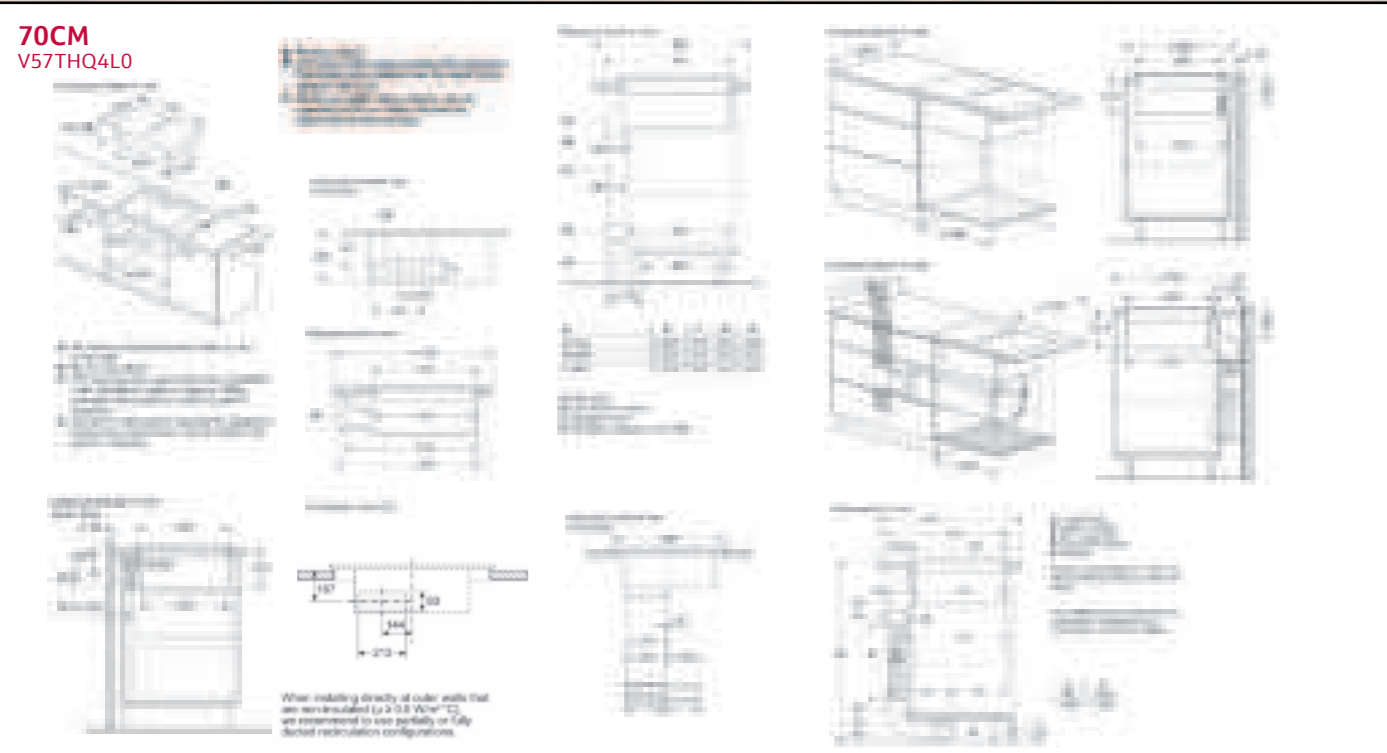

When installing directly against outer walls that are not insulated ($\mu \geq 0.5 \text{ W/m}^2 \cdot \text{C}$), we recommend using partially or fully ducted recirculation configurations.

80CM V58PHQ4C0, V58NHQ4L0, V58NBS1L0

70CM V57THQ4L0

When installing directly at outer walls that are not insulated ($\mu \geq 0.5 \text{ W/m}^2 \cdot \text{C}$), we recommend using partially or fully ducted recirculation configurations.

60CM V56NBS1L0

- A: Minimum distance from the hob cut-out to the wall
- B: Recessing depth
- C: The worktop into which the hob is installed must withstand loads of approx. 60kg; suitable substructures must be used if required
- D: Cut-out in back panel required for pipework. Exact size and position can be taken from specific drawing.

When installing directly against outer walls that are not insulated ($\mu \geq 0.5 \text{ W/m}^2 \cdot \text{C}$), we recommend using partially or fully ducted recirculation configurations.

Induction Cookware Accessories Range

Excellent accessories that perform as well as your hob does.

This range of Induction Cookware Accessories are designed to perfectly fit Flex Induction and Induction hobs. The rectangular shapes **perfectly fit into the flex zones**. The large flex pans **fits perfectly in the rails of our oven**.

All accessories are **oven-proof up to 220°C** with a **non-stick coating** that cooks your food perfectly while also being **easy to clean**.*

The pans are designed to be **easily stacked** to maximise your storage space.

* not suitable for dishwasher cleaning.

Double Flex Pans Set (4 Pans)

Includes:

- Flex Pan Large
- Flex Pan Medium
- 2x Flex Pan small with lid.

Z9404FF0

Single Flex Pans Set (3 Pans)

Includes:

- Flex Pan Medium
- 2x Flex Pan small with lid.

Z9403FF0

Large Pan

Very large frying surface for cooking big portions like for meat fish and more.

Z9401FF0

Teppan Yaki

- Oven proof up to 220C.
- Excellent non-stick properties
- Even heat distribution
- Easy to clean

Z9401TY0

Flex Design Hobs - Flex Induction

Flex Induction Hobs

Induction & Ceramic Hobs

Flex Induction Accessories

Spanning the length of your Flex Induction zone, our accessories are designed to inspire you in the kitchen. From everyday cooking to theatrical displays, there's an accessory to bring out the best in your favourite dishes.

Product	Description	Material	Code	Part Number
 <p>Griddle Plate</p>	<p>Surface Area 41.5 x 26.5cm</p> <p>Ideal for cooking steaks, fish, flatbreads and sliced vegetables, an induction griddle plate offers considerably more flexibility than a standard square griddle pan. All accessories within our induction range are easy to clean and dishwasher safe.</p>	Cast Iron	Z9416X2	17000339

Saucepans

Ferrous metal saucepans are required for use on an induction hob. To check if a saucepan can be used with an induction hob use our quick magnetic test. Also, if a saucepan made of unsuitable material is placed on the selected hotplate, the power level displayed on the hotplate indicator will flash. NEFF saucepans have been tried and tested to ensure that they offer optimum performance with NEFF hobs.

Product	Description	Material	Code	Part Number
 <p>3 Piece Pan Set</p>	2 x pots, 1 x Pan	Stainless steel	Z943SE0	17004098
 <p>4 Piece Pan Set</p>	1 x Saute pan, 2 x Pots with lids, 1 x milk pan	Stainless steel	Z9404SE0	17005721
 <p>6 Piece Pan Set</p>	2 x Saute pan, 3 x Pots with lids, 1 x milk pan	Stainless steel	Z9406SE0	17005724
 <p>18.5 cm Non Stick Frying Pan</p>		Cast Iron	Z9428FE0	17005718

Cook wild. CLEAN EASY

Master every meal with the NEFF Gas Hob range. Cook as passionately as you like without worrying about the clean-up afterwards.

Take your cooking to the next level with our gas hobs. Our Flame Select® technology gives you nine precise heat control levels. One advantage is that it prevents uncontrolled boiling or splashing, which makes cleaning up after cooking easier. And if your cooking does get a bit wild, don't worry. Our Comfort Clean features simplify the cleaning process with removable dials and pan supports suitable for the dishwasher. Savour the moments that matter and enjoy traditional cooking with a flame thanks to the ease of modern technology.

COMFORT CLEAN

Simplifies your cleaning process.

With the NEFF gas hobs, cleaning becomes much easier. The **removable Metallic Dials** and **dishwasher-safe Pan Supports** are designed for easy cleaning and maintenance. This way, you cook as passionately as you want without worrying about the clean-up afterwards.

Illuminated* Metallic Sword Dials

Our Illuminated Metallic Sword Dials are crafted from robust metal. Not only do they offer precision control over 9 power levels, but they also light up when the burner is on, making your cooking experience effortless. And the cherry on top? They're removable for easy cleaning. So, get ready to cook your culinary highlights without any clean-up worries!

FLAME SELECT®

Nine flames, infinite possibilities.

The Flame Select® technology regulates the gas output precisely. And because the amount of gas in each of the 9 levels is defined, you'll get the same cooking results over and over again. Another benefit of this precise steering is that it prevents uncontrolled boiling or splashing, which makes cleaning after cooking much easier.

Cast Iron Pan Supports

Don't worry about wobbly cookware. Our Cast Iron Pan Supports are built to steady your cookware while you focus on creating culinary masterpieces. Simply pop them in the dishwasher when you're done. Just pure cooking joy.

Introducing the first gas hob with WI-FI CONNECTIVITY

Our new gas hob is the first in the NEFF lineup to feature Wi-Fi connectivity, allowing for seamless pairing with our smart hoods.

HOB-HOOD CONTROL*

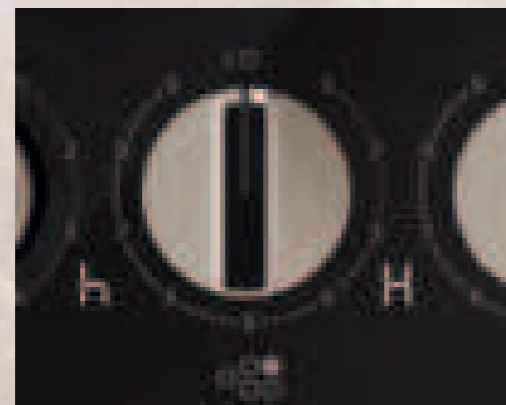

More creativity, less complexity.

The NEFF hood that automatically adjusts its fan speed based on the output of the compatible hob, ensuring optimal ventilation without manual adjustments.

TOUCH CONTROL DISPLAY*

Effortless precision at your fingertips.

The Touch Control Display offers a sleek, intuitive way to manage your cooking settings. With just a simple touch, you can set a timer or adjust the light and power level of your matching hood, making your cooking process smooth and enjoyable.

RESIDUAL HEAT INDICATOR*

Safety first, always.

Each burner's Residual Heat Indicator alerts you when the hob is still hot after use, helping to prevent accidental burns. This simple yet essential feature ensures that your cooking experience is as safe as it is fun.

GAS SAFETY CUT-OFF

Ease of mind all the time.

With the Gas Safety Cut-Off, your hob automatically shuts off the gas supply if the flame is accidentally extinguished, e.g. by some draft. This crucial safety feature gives you peace of mind, allowing you to focus on your culinary creations without worry.

TEMPERED GLASS SURFACE

Durability meets safety.

Safety Glass provides a robust and heat-resistant surface that enhances the look and durability of your hob. Designed to withstand the rigors of everyday cooking, ensuring your kitchen remains safe and stylish.

MONITORING ON/OFF STATUS VIA THE NEFF HOME CONNECT APP

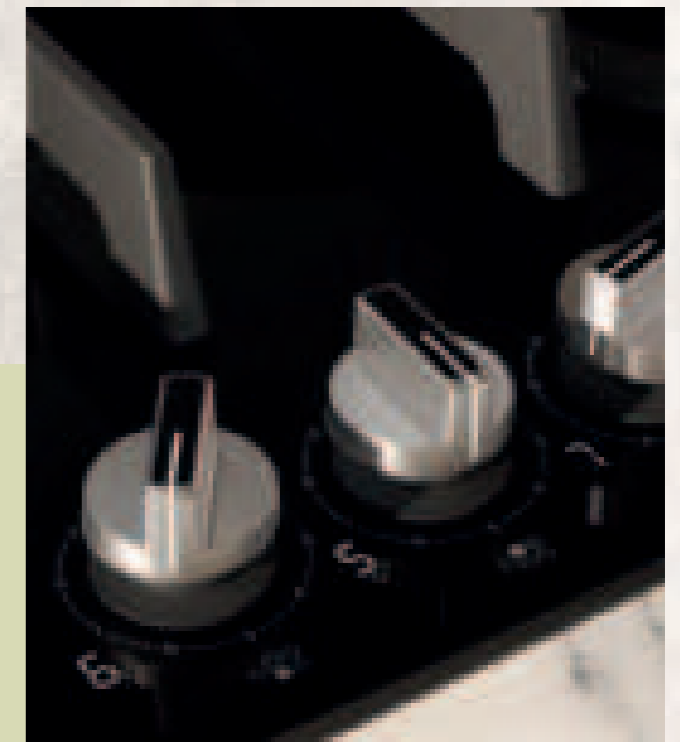

Stay connected.

Take control of your cooking experience with the NEFF Home Connect App. Whether in another room or on the go, you can monitor your hob's settings from your smartphone, ensuring your kitchen is always under control.

ILLUMINATED METALLIC SWORD DIALS & DISPLAY*

Elegant 24/7

Enhance your cooking experience with Illuminated Metallic Sword Dials, which not only provide a luxurious feel but also ensure precise control – even in low light. Paired with the Display, you can easily monitor your settings at a glance, making cooking both stylish and intuitive.

Control, Connectivity, Elegant – NEFF Gas Hobs Range at a glance

Choosing the right Gas Hob for you

NEFF offers metallic removable dials for classic heat control as well as easy cleaning. Wi-fi enabled, Hob-Hood control, Residual heat indicators and more allow you to choose the perfect option for you and your kitchen.

Gas Features

FLAME SELECT®

Cook everything just right with 9-level Flame Select®. With Flame Select® the gas flame adapts to your cooking, offering precise control every time. For the first time ever, cooking with gas is as easy as cooking on an electric hob.

POWER LEVEL DISPLAY

Some gas hobs benefit from a host of features that are usually found on ceramic hobs, including an LED display. The residual heat indicator displays if there is any residual heat on the hob. In the event of a problem with the individual burner the indicator lights also act as warning lights.

HIGH SPEED BURNERS

Provide a surge of extra power; particularly useful for boiling a large pan of water quickly.

WOK BURNER

The secret of Chinese stir fry cooking is heat and speed. Our Domino wok (N23TS19N0) delivers 6.0kW.

FLAME CONTROL

The flame failure safety device shuts down the supply of gas to the hob if the flame goes out for any reason. The automatic reignition uses a heat sensor to detect if the flame goes out and, if so, will automatically attempt to reignite.

CAST IRON PAN SUPPORTS

Firmly hold the pan above the flame, leaving space between the base and the burner. They're used on the majority of our models because of their robust and sturdy nature and tolerance to prolonged contact with heat.

EASY GRIP CONTROLS

Ergonomically designed to be gripped and turned easily, even with wet or greasy hands.

SIMMER SETTING

Excellent for slow simmering, almost all of our gas hobs have a very low burner with a maximum of just 1.0kWh.

NEFF VENTILATION Range

Ventilation is a key consideration in every kitchen; the Hob and Hood are a focal point of all cooking setups. The kitchen design and layout will dictate the Ventilation solution that is perfect for your kitchen.

NEFF have a clear and comprehensive range that can be installed in every kitchen.

Why NEFF Ventilation?

Performance – NEFF focus on extraction performance and have options to suit all kitchen styles. Depending on whether using induction or gas there is an option for every hob.

Design – this is as important as Performance in a kitchen as the style of the hood needs to match the style and aesthetics in the kitchen – NEFF have a broad range of hoods that can be the focal point of the kitchen or installed neatly in furniture.

Connected – NEFF Home Connect allows your hood to be controlled by your smartphone or voice assistant, making the cooking experience easier. Features such as Climate Control & Hob-Hood Control are further options for easy use of the Hood.

Installation – all NEFF hoods have been designed with the installation front of mind. With ducting and filters to match the installation solution – it's easy to navigate the range and order the appropriate kit. There are also installation videos to assist.

Introducing the new generation of NEFF Hoods

Our next-generation Integrated Design and Box Hoods combine stunning style with superb performance. Whether you want a striking stand-out feature or a hood that tucks neatly into upper cabinets, these models give you the installation flexibility to match any kitchen aesthetic. Integrated Design Hoods can be installed easily by one person and provide handy storage (supporting 10kg either side), while the Box Hoods deliver a sleek, subtle matt-black chimney and side trim ideal for fitting between cabinets or open shelving.

Your Guide to Control Types

NEFF Home Connect

Compatible with Amazon Alexa and Google Home.

Push Button

Our classic hoods feature simple, sleek and easy to use push button controls. Available across selected models in the N30 Collection.

Rocker or Slider Switch Control

Available on our N30 Telescopic and Canopy models, our rocker or slider switch control offers a simple and straight forward setting navigation that's neatly concealed within the hood furniture.

Touch Control

Featured on selected models in the N90, N70 and N50 Collections. Touch Control flawlessly complements our ovens and compact appliances. An LED display is also available with selected Touch Control models.

Remote Control

Available for Ceiling Hood.

Key Functions Guide

Features

NEFF HOME CONNECT

Control all functions and settings of your hood directly from your smart phone and voice control for the ultimate connected cooking experience.

HOB HOOD CONTROL

The Hob Hood Control allows the hood to be directly controlled from the hob. This means the hood turns on when you start cooking and, in automatic mode, can automatically regulate the power level for the best performance with the lowest noise – it also means you no longer need to worry about adjusting the hood and you can focus on your cooking.

CLIMATE CONTROL

Detects the amount of steam and smells using a sensor attached to the motor and automatically sets the most effective power level to extract it.

AMBIENT LIGHT

Illuminates your kitchen in the light that suits the occasion best. Choose from 31 colours to change how your kitchen looks and, most importantly, how it makes you feel.

SMART HOOD AUTOMATIC

Automates range-hood control via Home Connect: the hob sends data to the hood, which adjusts fan speed and suction for efficient odour and particle removal. It reduces noise and energy use by lowering speed or switching off when the cooktop is idle, giving hands-free, optimised ventilation.

EFFICIENT DRIVE MOTOR

Our Efficient Drive motor brings harmony to the kitchen. It's whisper-quiet and powerful too. Now you can focus on your cooking, and your guests, while your extractor keeps your kitchen calm, clean and serene.

NEFF SILENCE BUTTON

The unique noise reduction function reduces the fan noise by a couple of decibels, ensuring that the kitchen stays quiet while you cook and entertain your guests. This function can be used at any fan setting except fan setting 1.

SATURATION INDICATORS

Take the stress out of guessing, this function will prompt you if the grease filters should be cleaned. If the hood is installed in recirculation, this will also indicate when the charcoal filters need replacing.

BOOST POSITION

For our sleek angled glass and flat hoods, receive an extra boost of extraction performance in special cooking situations, for example when frying meat or fish. The front panel can be slightly opened during cooking to a defined extraction boost position in order to increase the steam catching rate of the hood and keep your kitchen free from steam.

Functions

AUTOMATIC AFTER-RUNNING

Continues running at a low speed for 3-30 minutes before turning itself off. Perfect for keeping fresh air in the kitchen post-cooking.

INTENSIVE SETTING

Boosts the extraction rate to the maximum level to cope with particularly demanding cooking conditions.

ELECTRONIC POWER LEVEL DISPLAY

The sleek display clearly shows the selected fan power level setting.

NEFF FRESH AIR

Runs an automatic air exchange programme, turning the hood into power level 1 for 5 minutes every hour for as long as required.

AUTOMATIC REVERT

Automatically reverts the hood back to a lower power level after approximately ten minutes of being on the intensive setting.

SOFT LIGHT

Brightens or dims the lights as it's switched on or off; just press and hold to adjust the level of brightness.

Installation Options

The best way to remove steam and odours is to extract the air out of the room through ducting. Unfortunately, in apartments or where the hood is too far away from an outside wall, this may not be possible. In this case, the only alternative is to recirculate the air. Stale air is sucked through a grease filter, before being purified in a charcoal filter, and then pumped back into the kitchen via an opening in the hood.

Recirculation

Recirculating

Removes between 70-95% of odours depending on filter used. Requires changing of charcoal filter on a regular basis or a longer-lasting Regenerative filter for certain models can be used.

Extraction

Ducted

Removes up to 98% of odours in an optimal installation. Requires planning of ducting (ducting to be sourced separately), however doesn't require a recirculation charcoal filter.

Use the following equation to calculate your extraction rate:

Volume of kitchen (length x width x height) eg. 4m x 3m x 2.5m = 30m³

6 x volume in normal operation and 12 x volume in intensive operation.

Please note that these are recommended estimates only to be used as a guide. This assumes a 2.5m standard ceiling height with 12 air changes per hour to match to an intensive extraction rate.

Regenerative Recirculation Filters

The new Regenerative Charcoal Filters give you a long lasting filter, thanks to a regenerative process using your oven, and can even be installed without a chimney piece if preferred. Benefit from up to 95% odour reduction when in recirculation mode.

Identify your extraction rate

Your extractor needs to circulate the air in the room 6 times in normal operation, 12 times in intensive operation, per hour. Use the below to help identify the required extraction rate which can then be used to select the appropriate extractor.

	2.5m	3m	3.5m	4m	4.5m	5m
2.5m	16m ³					
3m	19m ³	23m ³				
3.5m	22m ³	26m ³	31m ³			
4m	25m ³	30m ³	35m ³	40m ³		
4.5m	28m ³	34m ³	39m ³	45m ³	51m ³	
5m	31m ³	38m ³	44m ³	50m ³	56m ³	63m ³

Recirculation Filters

We offer a range of recirculation filters that are available depending on the model of hood you choose. Featuring powerful odour reduction rates and performance benefits, our new regenerative filters can last up to 10 years and are regenerated through a heating process in the oven every 4 months.

TYPE	Standard Odour Filter	Cleanair Plus Filter	Long-life CleanAir Filter	Long Life Regenerative Filter
				
ODOUR REDUCTION	Up to 85%	> 90%	> 90%	> 80%
RECOMMENDED EXCHANGE	Approx. 2 times per year	Approx. once per year	Approx. once every 4 years	Approx. once every 10 years
KEY BENEFITS	<ul style="list-style-type: none"> Simple installation Anti-fish treatment 	<ul style="list-style-type: none"> Up to 3dB (A) sound reduction Better extraction performance Anti-fish treatment Removes over 99% of all pollen 	<ul style="list-style-type: none"> Up to 3dB (A) sound reduction Better extraction performance Anti-fish treatment Removes over 99% of all pollen Oven Heating – 3 Hours 100°C regenerates filter for 12 months – can be done up to 3 times. 	<ul style="list-style-type: none"> Up to 3dB (A) sound reduction Regenerated in the oven every 4 months recommended (2 hours 200°C) Better extraction performance

The filters within the table are not necessarily compatible with all Hoods. In some instances, an additional module may be required to house the filter. Images for example only, filters may come in different sizes/styles.

Installation

The following points should be observed for optimum ducted extraction results and low noise:

1. Ensure any pipe elbow bends are at least 30cm from the hood ducting opening.
2. Avoid reducing the diameter or area of the ducting.
3. Use wide-angled pipe elbows, but keep the number used to a minimum.
4. Only install pipes with smooth, even inner surfaces. If a flexible hose has to be used, ensure it is pulled tight to smooth out the ridges before fixing.
5. Use ducting pipes with a diameter of at least 120mm, but ideally 150mm.
6. Keep piping to a minimum – use the most direct route to an external outlet.
7. Make sure that there is an adequate supply of fresh air to replace the air ducting out of the kitchen, i.e. windows that can be opened, doors to adjacent rooms, air bricks. Problems with installation may occur if points 1-7 are not observed.

Easy Mounting System

Thanks to an easy wall-mounting system, selected hoods can be installed quickly and securely by one person. Rotating offset 'cam' fixings make it possible for positional adjustments of up to 6mm, helping to get the hood level and stable. (Not available on all our hoods.)

Effortless Compatibility: Experience

NEFF's Hob Hood Connectivity

NEFF offers two systems for automatic control of your hood: Smart Hood Automatic and climateControl sensor.

These systems simplify hood control, allowing you to focus on cooking without the need to reach up to the hood. It's advisable that you choose the same width for your hob & your hood.

HOODS	VALUE CLASS	DESIGN / RANGE	90CM RANGE	
			Model	Image
CLIMATECONTROL SENSOR HOODS Hoods equipped with our climateControl sensor work with any hob. The intelligent sensor detects smells and steam before adjusting the Hood's fan speed levels accordingly.	N90	Flex Design	I98WMM1Y7B Glass Draft Hood	
		Core Range	I98WMM1S7B Glass Draft Hood	
		Flex Design	D98IPT2Y5 Wall Mounted Angled Hood	
		Core Range	D98IPT2S0B Wall Mounted Angled Hood	
SMART HOOD AUTOMATIC Smart Hood Automatic by NEFF improves hood functionality with intelligent automation. The NEFF Home Connect compatible hob will share output data with the hood which will then automatically adjust its fan speed and suction power. This ensures efficient removal of odours and airborne particles. The system prioritises energy efficiency while minimizing noise levels by reducing speed or powering off when the cooktop is not in use. Smart Hood Automatic enhances the cooking experience by eliminating the need for manual adjustments and providing hassle-free ventilation. It represents an innovative solution for optimizing range hood performance and user comfort.	N90	Core Range	D98XET2S0B Integrated Design Hood	
	N70	Core Range	D97BDN2S0B Wall Mounted Box Hood	
	N50	Core Range

Compatible Hobs

Smart Hood Automatic requires a compatible NEFF hob and the NEFF Home Connect app. Using intelligent algorithm technology, the Hood will adjust its fan speed level based on the Hob's output. Within the range of Home Connect enabled hoods in the NEFF Range of N90 & N70 hoods these will compatible with the hood range above.

Glass Draft Hoods Flex Design

Seamless Hob Installation

Celebrate your kitchen design with visual unity. Our Glass Draft Hood has been designed to be installed seamlessly with any of our Flex Design hobs in the corresponding 90cm or 80cm width.

Ambient Light

The passionate cook's perfect must-have. Our Glass Panel with Illumination is unobtrusive so it will never divert attention from the peaceful view into your open plan kitchen or living area. Connect your Glass Draft Hood with the NEFF Home Connect app and choose from endless colours for the edge of your Glass Panel. Then treat yourself to a unique cooking experience every time with your choice of individual lighting.

Open for fresh designs

Within the Flex Design Range NEFF offers two Glass Draft Hoods and one Angled Hood in the range. These are quite straightforward in ordering the trims as they are a standard size for the appliance. The exception is where the Glass Draft is to be installed seamlessly with the relevant Flex Induction Flex Design Hob - the details are included in the next section.

Brushed Bronze Anthracite Grey Metallic Silver Deep Black

Personalise your hob and hood with easily interchangeable Flex Design Trim, available in four distinctive colours, to coordinate with your oven, coffee machine and your Twist Pad Flex®.

Island Ventilation Solutions

Open plan kitchens are growing in popularity and these solutions can create that open plan aesthetic.

Glass Draft Hood

- Modern version of a downdraft hood is a highly effective worktop ventilation solution that vanishes completely when not in use.
- A unique solution with impressive design and performance credentials.
- Guided Air technology has an additional motor with a fan that creates a “V” shaped curtain of air behind the screen – pushing down cooking vapours which are captured by the extractor fan.
- Fully Automated Extraction – using climateControl sensor to detect the amount of humidity and grease in the air – automatically adjusting to the correct level.
- Ambient lighting – using the NEFF Home Connect app the colours can be changed to suit the room or the vibe in the kitchen.

Venting Hob

- Designed with open plan living in mind – Extremely silent powerful ventilation.
- Generous glass surface area with a slim integrated vent creates a flexible work surface which is simple to clean.
- Easy to remove Grease filter can hold spillages of up to 200ml.
- Grease filter and holder and dishwasher safe for easy & effective cleaning.
- Flex Induction & Combi Zone models available.
- Choice of Controls – Twist Pad® or Touch Twist®.
- Available in Black Glass or new Matt Black finish in Flex Design Range.

Seamless Hob Installation

- To create a unified hob and hood installation the Glass Draft Hood can be combined with selected Induction hobs.
- Available for both 90cm and 80cm widths.

Ceiling Hood

- Designed for modern island and peninsula kitchen layouts.
- Provide high performance with low noise levels.
- Easy adjustable installation for different thickness of ceiling material and construction.
- Flush mounted.
- Can be used in extraction or recirculation mode.
- 360° turntable motor – easy access for ducting and power connection once installed.
- Can be used with Clean Air or Regenerative filters.

Flex Design Trim

All Flex Design Venting Hobs require a set of Flex Design side trims to be ordered. All trims are a standard size and available in all 4 colours.

Finish	Model Number
Anthracite Grey	Z90802PFAY0
Brushed Bronze	Z90802PFBY0
Deep Black	Z90802PFDY0
Metallic Silver	Z90802PFMY0

Twist Pad Flex®

To complete the Hob the choice of Twist Pad Flex® also needs to be ordered. Choose a side trim and Twist Pad Flex® in the desired colour.

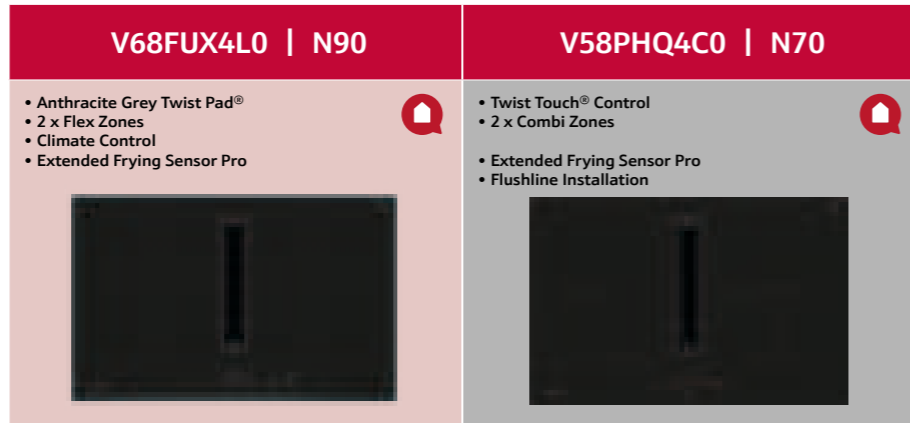

Finish	Model Number
Anthracite Grey	Z9801TWAY0
Brushed Bronze	Z9801TWBY0
Deep Black	Z9801TWDY0
Metallic Silver	Z9801TWMY0

¹ Air flow and noise declarations made in line with CECEC Code Of Conduct. ² Measured according to EN61591 on largest pipe diameter. ³ Sound power measured according to EN60704-3 on largest pipe diameter.

Venting Hobs

- Installed with energy efficient brushless motors that offer powerful but quiet performance.
- Can be installed in Recirculation or Ducted Out – 4 Ventilation solutions available.
- A larger Overflow container will hold up to 700ml and is integrated in the base of the appliance so will not impact on storage space below.
- To install in re-circulation mode no further components are required.

Wall Mounted Ventilation Solutions

Hoods installed on the wall can be used to create a design feature in themselves, adding a focal point to your kitchen while offering powerful extraction for all types of cooking.

Matt Black with Gloss front panel

NEW Box Chimney *now available*

Elegant and understated design with exceptional performance.

Perfect design – aesthetic design to fit to modern kitchens. Matt Black design accents with gloss control panel, easy to clean.

Automatic Hood Control – Connects to hob using Smart Hood Automatic technology.

Powerful yet quiet high extraction performance with efficient silent drive motor.

Super silent operation – noise 56 dB*

- Classic box design
- Highly Efficient
- Efficient Silent Drive Motor
- Smart Hood Automatic
- Touch Control
- LED Lighting
- Dual-Filter System
- Matt Black chimney & side panels – Front panel gloss

Sleek Touch Control interface

LED low energy lighting

Angled Glass

- Inclined front with dimmable LED mood lighting.
- Fully Automatic Air Sensor.
- Whisper quiet ventilation.
- Chimless or Chimney options.

Pyramid Chimney

- Traditionally styled.
- Broad variety of sizes & specifications.
- Quiet operation.

Integrated Furniture Ventilation Solutions

A great fit

Offering improved performance, reduced noise and a fresh, modern look the NEFF range of Integrated Design Hoods is the new standard for wall-cabinet extractors. Understated or bold, these space-saving hoods blend seamlessly with any kitchen while delivering a quiet, powerful fan to keep air fresh and steam-free.

Available in Telescopic, Canopy and Integrated styles.

Integrated Design Hood

The Integrated Design Hood sits flush with your kitchen units and stays virtually invisible until use, when only a hinged glass panel appears.

Maximum storage – Its smart layout offers personalisable upper-cabinet storage, holding up to 20kg of storage.

Seamlessly integrated – in operation the matt black panel folds out and a special coating hides fingerprints for easier cleaning.

Automatic Hood Control – NEFF's 1st connected hood with automatic hob-hood control – Smart Automatic Air sensor & smart hood automatic.

Powerful efficient silent drive motor is effective and quiet – 57dB* – so won't interrupt conversation.

The Integrated Design Hood can be installed by a single person – thanks to the well thought out design, construction and installation guide. Perfect replacement for telescopic or canopy hoods.

*(exhaust mode, highest normal level)

Wonderfully practical when open while being beautiful and seamless when closed

Canopy Hoods

Thanks to the Hidden Design feature your integrated Canopy Hood is practically invisible, disappearing in your kitchen cabinets. The flush-fitted design of your hood keeps your kitchen sleek and clutter-free.

Our hoods combine high-extraction motors that remove steam and odours at the source, whisper quiet operation, and bright LED lighting for a cleaner, calmer, and better-lit cooking experience.

Telescopic Hood

- For a smaller kitchen where space is at a premium, these clever hoods pull out from underneath a cabinet when required.

Integrated Hood

- These hoods look like they're part of the furniture.
- Hidden behind a unit door, they simply pull out when needed.

LAUNDRY

NEFF COOLING *Range*

Let's keep it fresh

Fridges and freezers for food lovers.

- Fridges and Freezers are essential for any home chef and finding the perfect solution is easy with the NEFF Cooling Range.
- The range is comprehensive in both the features and the installation.
- NEFF's range of cooling appliances focuses on Built In integrated models with a range of Fridges/Freezers in a variety of sizes and splits, and a range of single door Fridges and Freezers. This means that a customer can choose just how much fridge and freezer space they need, whilst the range of hinges allows scope to include in a variety of kitchen designs – neatly integrated as part of the overall kitchen.
- The NEFF range is packed with features to really care for ingredients. With many key cooling features, customers have the flexibility to build exactly what they want in their kitchen.
- The range is clearly laid out in height order leading with Fridge Freezers followed by the single appliance range.
- For those who want extra capacity, the XL & XXL are the newest additions designed to cope with the largest demands.
- Many of NEFF's cooling range are covered by our **5 year warranty** – clearly marked in the matrix tables. Further warranty information can be found on NEFF Customer Service pages 262-263.

Built-In Fridge Freezer Guide

Fridge Freezers

Comprehensive range of models to suit customer needs.

- Available in two heights
 - Standard 177cm in various “splits” 70/30, 60/40, 50/50 of Fridge to Freezer.
 - The New 193.5cm tall XL & XXL range – available in a 60/40 split of Fridge to Freezer.
- Available in fixed & sliding hinge to accommodate design and kitchen furniture.
- All Fridge Freezers have a 4-star rating.

Hinge Types

Hinges to suit all kitchen designs

Our doors can be right-hinged or left-hinged in order to suit your kitchen design.

Fixed Hinge & Soft Close Hinge

The benefit of this type of hinge is that it carries more weight – ideal for kitchen cabinetry made from heavier hard wood. This hinge also allows the door to open at a wider angle, making the fridge cavity easily accessible. All NEFF doors close automatically when at an angle of approximately 15-20° and selected models have the benefit of Soft Close.

Sliding Hinge

Our sliding hinge feature sits between the appliance and the furniture door and is secured by a series of brackets. As you open the furniture door, the appliance door is also opened via the sliding bracket design.

A fixed hinge offers you additional capacity in the refrigerator, leaving you more room for your food.

Additional space is required on the inner side of the cabinet to make way for the door hinge.

Built-In Single Fridge & Freezer Guide

Single Fridges & Single Freezers

For customers looking to install a single fridge and freezer this range will suit their needs.

- Available in several heights to create a bespoke cooling solution.
- Extensive installation combinations – Side by Side, Over & Under & Built Under options available.
- All appliances have a 4-star rating.

Size Guide & Installation Options

Combination and layout solutions for installing cooling appliances

With so many kitchen styles to choose from, at NEFF we've catered for all spaces and lifestyles. With the option to build a cooling solution shaped to specific requirements, our installation options are designed to offer the ultimate flexibility. From side-by-side fridge and freezer installations to over-under stacked installations, it's easy to incorporate NEFF appliances into the overall kitchen design.

Installation Solutions

- The range can be installed Over/Under to create a bespoke solution.
- Depending on the fridge and freezer capacity required, the range can be installed to create the ideal solution.
- The range can be installed Side by Side and the Tall Fridge & Freezer create equal fridge and freezer capacity.

Over/Under installation options

Side by Side installation options

Other Styles

Freestanding Fridge Freezers

NEFF now offers a choice of configuration – Side by Side or the NEW multi-door format.

- With the new multi-door format the top fridge compartment with the double door opening features full width shelves - perfect for a big shop or prepared meals.
- For a built in appearance, it's possible to install the freestanding fridge within a cabinet run and add a decorative surround – the appliance is not fully integrated into cabinetwork, so ensure adequate airflow.

Both appliances feature:

- Flexible shelving throughout for adaptable storage.
- NoFrost technology in both fridge and freezer – no manual defrosting.
- Ice & water dispenser – In party mode the ice maker can make 5kg of ice in 24 hours – perfect when hosting.

Built Under Solutions

Wine Cabinets

- Available in two widths; 30cm – 21 bottle capacity /60cm – 44 bottle capacity
- 2 in 1 Temperature Zone (5°C-20°C)
- Individual temperature zones to store white and red wine.
- Interior light

Built Under Fridges & Freezers

- 82cm high to install under a worktop
- Super Cool with NEFF Home Connect app
- Some models with 4 star freezer section
- LED lighting

Cooling Functions

MULTIPLE COOLING SYSTEMS

Separate cooling circuits for independent temperature control, to prevent the transference of odours and/or humidity between the fridge and freezer cavities.

NO FROST

No Frost freezers automatically react to any signs of frost so it never has a chance to build up. With a No Frost freezer, air is blown from the back wall and circulates over food items. As a result, there is no condensation or build up of frost and food does not freeze together.

SUPER FREEZE

To stop already frozen food warming up just by being in the same drawers, the freezer temperature can be lowered in preparation. Super Freeze lowers the temperature temporarily before switching back automatically. Simply activate "Super Freeze" via the NEFF Home Connect app.

INTELLIGENT COOLING

Uses a range of innovative sensors to calculate the quantity of food in the fridge and the outside temperature. The fridge then adjusts the internal cooling power accordingly.

DOOR OPEN

Door Open and high temperature alarm systems alert if the door has been left open or a power cut has occurred. Ideal for mitigating food wastage.

DOOR OPEN ASSIST

Open the fridge with a simple push or a single word. The push to open mechanism is a perfect match with handle free kitchen furniture.

MULTI AIR FLOW COOLING

Greatly improves the circulation of air around the fridge, regulating the temperature and humidity levels and eradicating condensation build up, so that food stays fresher for longer.

LOW FROST

Low Frost improves performance and reduces frost build up in an energy efficient way. It also provides more storage space due to there being no internal evaporator. It also means the freezer is likely to only need defrosting every 2-3 years.

COOL AIRFLOW

Our Cool AirFlow system treats ingredients as lovingly as they were picked. Cool AirFlow circulates the air evenly in the fridge to keep flavours delicious under ideal cooling conditions.

SUPER COOL

Allows for the increase in temperature that occurs when fresh food is added. As soon as the food is cold, the fridge will readjust to the normal temperature.

FRESH SAFE

Our innovative 0°C Fresh Safe preservation system extends the life of food to reduce waste.

Design Features

Unique to NEFF, making your life even easier

EASY CLEAN MAGNETIC DOOR SEALS

The magnetic door seals on all of our refrigeration ranges are removable, making them easy to clean and/or replace if necessary.

SOFT CLOSE

With Soft Close, the fridge door closes automatically when open at an angle of 20° or less. With a soft closing mechanism, it's the ideal addition to kitchens with soft close cabinets.

ANTI-SPILL TRIMS

Effectively hold up to a pint of liquid in case of accidental spillage. Food is protected below and the clean-up process is a little less messy.

WIRE SHELF

Completely unique to NEFF, our new Wire Shelf feature is ideal for securely storing jars and bottles stacked on their side.

EASY LIFT SHELF

With Easy Lift shelving, it's possible to adjust shelves with just one hand – even when they're fully loaded. Perfect when unloading shopping or introducing freshly prepared dishes to the fridge.

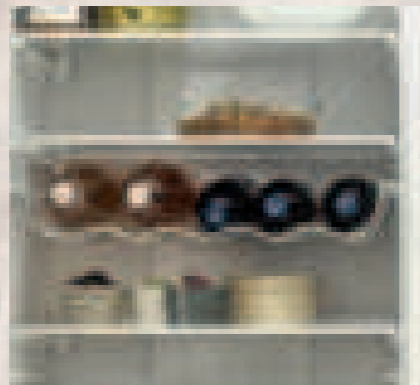

EASY LIFT DOOR STORAGE

Easily adjust door storage with just one hand. Combined with Easy Lift Shelves, the fridge space won't restrict what can be stored.

EASY ACCESS SHELF

The retractable glass shelf allows for easy loading and unloading as well as better access to the food. Ideal for putting the finishing touches to those delicate desserts.

BOTTLE RACK

Always have a chilled bottle on standby for those impromptu get-togethers.

VARIO SHELF

Designed to offer complete flexibility in the fridge, sectioned glass shelves can simply be separated and slid underneath when not in use. Ideal for larger dishes, with space left over for a convenient condiments storage area at the back.

NEFF Home Connect

Home Connect

Simply use a smartphone or tablet to control your XXL fridge, even when on the go. Using the NEFF Home Connect app allows access to smart benefits, including controlling the fridge on the go and easily setting it to Eco or Holiday mode, even when no longer at home.

Individual Temperature Control

Tastes vary – and so do the ingredients. Individual Temperature Control enables temperature adjustment depending on what is being stored. Simply choose an eco-friendly mode with a higher temperature for the fridge via the electronic control panel, while the Individual Temperature Control keeps the freezer up and running.

Door Alarm

Say goodbye to the frustration of accidentally leaving the fridge door open. Equipped with both visual and acoustic alarms, the fridge signals that it needs another gentle shove for sustainable cooling. Even if the door is slightly ajar, the fridge will request a gentle nudge to maintain optimal temperatures. And for added convenience, if your fridge is integrated with the NEFF Home Connect app, you'll receive notifications directly to your smartphone.

Freezer Light

Our Freezer LED light illuminates every frozen ingredient in the drawers. And if the appliance is NEFF Home Connect enabled, the light can be adapted depending on preferences. Also, the emotion light can be activated which adds a lovely light effect to the kitchen even when the doors of the fridge and freezer are closed.

Fresh Safe <0°C>

Enjoy a variety of storage options to suit preferences, including a flexible drawer for fruits and vegetables. In addition, the unit features a dedicated compartment for meat and fish that's kept at an optimal temperature up to 0°C.

NEW Multi-door DESIGN

Introducing the New Multi Door Fridge Freezer to the NEFF range

A statement appliance that blends contemporary design with serious refrigeration performance. Finished in dark steel, it brings modern style to the kitchen while protecting ingredients with intelligent storage, precise cooling and low maintenance technology.

- **Design & capacity:** Dark steel finish and a wide, double door fridge opening create a sleek, contemporary look and plenty of room for large platters and big shopping trips.
- **Flexible, customised storage:** Adjustable shelves, removable drawers, split shelves and door bins – plus convertible compartments – let you rearrange the interior to suit shopping habits and oversized items.
- **Precise, multi zone cooling:** Dedicated temperature zones and multi airflow/twin cooling systems maintain optimal temps for different foods, deliver even cooling throughout the cabinet and cut odour transfer between compartments.
- **Bright, low maintenance operation:** Efficient LED lighting keeps the interior clearly illuminated, while no frost/auto defrost systems prevent ice build up and eliminate the need for manual defrosting.

NEW multi-door fridge freezer

Freestanding by design, built-in look

This freestanding fridge offers the flexibility of a standalone appliance with the clean, integrated appearance of a built-in. When sited within a run of cabinets and given the recommended ventilation and service clearances, it can sit flush with surrounding units for a seamless finish. For precise door-opening, ventilation and installation dimensions, please refer to the product line drawings and installation guide.

*25mm gap required at the back between the appliance and the back wall

Model shown: **KM3963XE0**

4 door

- **XXL capacity:** easily store your weekly shop
- **VitaFresh technology:** keep your fruit and veg fresh for longer
- **No Frost:** no more defrosting!
- **Super storage:** the freezer cavity comes with two No Frost Big Boxes – ideal for stacking meal prep containers

Instant refreshment with ice & water

There's nothing better on a hot day than a cold glass of filtered water and cubed or crushed ice for your drinks. That's why our multi doors with the quick ice & water dispenser gives you instant refreshment with up to 5kg ice within 24h - including a water filtration system. It also has a hands-free bottle filling function for water with adjustable filling height.

 Climate zone SN = designed to operate in ambient temperature of +10°C to 32°C.

Freestanding Fridge Freezers

KA3923IE0G | N70

- Side by Side arrangement
- Brushed Steel Anti-fingerprint
- Automatic Ice & Water (Plumbed In)
- 2 Fresh Safe Drawers (Fridge)
- No Frost

KM3963XE0 | N70

- Multi door – Fridge Top / Freezer Bottom
- Black Inox Anti-fingerprint
- Automatic Ice & Water (Plumbed In)
- 2 Fresh Safe Drawers (Fridge)
- No Frost
- Configuration allows wider fridge space

NEFF DISHWASHER *Range*

5 Year Warranty

Peace of mind built-in – all of NEFF's dishwashers are covered by our **5 year warranty** – clearly marked in the matrix tables. Further warranty information can be found on NEFF Customer Service pages 262-263.

Dishwasher Solutions

Clean dishes, whatever your wishes.

- Range includes fully integrated and slimline.
- The Vario Hinge gives maximum flexibility in fitted kitchens by allowing the door to slide over the plinth. A further benefit is it enables higher cabinet installation to improve reach and usability for people with reduced mobility or other accessibility needs.
- Comprehensive range of cleaning features including Chef 70°C and Eco 50°C as standard.

Full Size Dishwashers

Designed to be as flexible and accommodating as possible, our full-sized dishwashers have adjustable baskets and racks to hold large or awkward items, as well as a choice of wash cycles, from intensive to delicate.

Featured model:
S197YCX05G
N70 60cm Fully
Integrated
Dishwasher

Slimline Dishwashers

Where space is an issue, our Slimline model **S875HKX32G** is ideal. Just 45cm wide, it fits into the smallest of spaces, but still offers all the features of a full size model. It's surprisingly roomy and able to cope with nine place settings at a time.

Featured model:
S875HKX32G N50
45cm Fully Integrated
Dishwasher

NEFF Dishwashers Range at a glance

- All dishwasher models can be controlled by the NEFF Home Connect app
- Water consumption: 9.5L (60cm width) / 8.5L (45cm width)
- 10 year anti-rust warranty
- Noise level 40-46dB

Home Connect

All dishwashers come with a **5 Year Warranty**

REFRIGERATION

DISHWASHING

LAUNDRY

Key Functions Guide

Design Features

AQUA STOP

Protects inlet and outlet hoses from leakage. A safety valve prevents any more water from entering the dishwasher and overflowing – even when the machine is off.

OPEN DRY

No need to manually open the door of your dishwasher to allow the load to cool off. Open Dry takes care of that by opening the door automatically during the drying phase.

INFO LIGHT

Info Light projects a red light onto the floor that showcases clearly that this dishwasher is in operation. Info Light is available for fully integrated dishwashers.

HEAT EXCHANGER

Ensures that the drying phase of programmes is energy efficient and glassware is fully protected by preventing extreme temperatures.

DOOR OPEN ASSIST

Door Open Assist is the perfect solution for anybody looking to achieve a sleek, handleless design in their kitchen. Simply press lightly on the front of the unit to open the dishwasher door. Ideal for a range of integrated designs, Door Open Assist is also a convenient addition to busy kitchens. Electronic child lock can be activated, creating a double push to open.

ZEOLITH

The Zeolith compartment, located under the dishwasher cavity, contains natural minerals. During the drying phase, these minerals absorb moisture and release hot air. This ensures efficient drying and leaves an impressive sheen on items of all shapes and sizes, including difficult-to-dry plastic goods. And because they recharge during the next washing cycle, you get great, longlasting drying results, without the maintenance worries.

GAP ILLUMINATION

Gap Illumination shines a soft white light on the side of the dishwasher to indicate the dishwasher is running. If you pause the cycle or open the door, the light will start blinking. This feature is available across Vario Hinge models.

TIME LIGHT

Time Light projects the remaining time as well as the ongoing process of the programme on any type of kitchen floor. Time Light is available for fully integrated dishwashers and washing machines.

VARIO HINGE

Vario Hinge lets you install your dishwasher at floor level or higher. When you open the door, it lifts up the front panel so that it opens freely and doesn't make contact with the base underneath. Now you don't have to compromise on kitchen design, and your dishwasher will combine effortlessly with every other unit.

EMOTION LIGHT

LED lights in the front edge light up the dishwasher cavity.

GLASS CARE SYSTEM

Your dishwasher has a thing for delicate glassware, so it fine-tunes the water hardness to protect your glassware with never-ending care. A combination of the Glass 40° programme and Extra Shine option will clean your items impeccably without worry. With the introduction of anti-slip surfaces, silicon inserts and supports within Flex 2 baskets your glassware has never been more protected.

Special Functions

EXTRA SPEED

Depending on the selected programme, you can reduce the running time of your dishwasher's programme to up to 66%. Make more of your quality time and enjoy optimum cleaning and drying results - while Extra Speed takes care of the load up to three times faster.

POWER ZONE

Activates higher wash temperatures and increases the spray arm pressure in the bottom basket, while maintaining a more gentle wash in the top basket.

EXTRA SHINE

By increasing the amount of water during the rinse cycle and extending the drying phase, water marks are prevented and the drying result is further improved.

EXTRA HYGIENE

Provides a hotter final rinse, with 70°C water for 10 minutes, to effectively cleanse items such as chopping boards and cooking utensils*.

*Please note this programme does not sterilise.

Programmes

FAVOURITE

Choose a programme, option, or combination on your dishwasher and save it as "Favourite", either via the NEFF Home Connect app or directly on the dishwasher. As standard the Favourite button is a 15 min rinse.

1 HOUR 65°

No need to stack your dinner or party dishes for hours, simply load the dishwasher again. This function cleans and dries dishes in only 60 minutes. Spend more quality time with family and friends while enjoying food and tales using your favourite tableware.

EASY CLEAN

Give your dishwasher a deep clean with the new Easy Clean programme. Simply run the high temperature setting, together with some dishwasher cleaner, in an empty machine to remove limescale and grease from inside the cavity.

AUTOMATIC PROGRAMMES

Take the worry out of selecting exactly the right programme and let the machine do it for you. The programme automatically changes settings to ensure you get the best clean for your load.

SILENCE

Select 'Silence on demand' on the NEFF Home Connect app whenever you wish for peace and calm. On activation, the cycle will pause for 30 minutes. You have the flexibility to restart the cycle at anytime if you wish; after 30 minutes the programme will resume.

CHEF 70°C

With a hotter setting and a powerful spray, the Chef 70° programme is perfect for cleaning even the dirtiest pots, pans and cooking utensils. Items placed in the lower basket are subject to higher spray pressures, eliminating the need for soaking and effectively removing even the most stubborn stains.

10-YEAR, ANTI-RUST WARRANTY

Due to advanced materials and manufacturing technologies, in addition to our standard appliance warranty, we're able to provide a free-of-charge warranty against the rusting-through of the dishwasher's inner cavity.

Dishwasher Flexibility

Flex Baskets

Fitting casserole dishes, large pans, full dinner sets and tall-stem wine glasses into a dishwasher can be a challenge – especially when you're cleaning your most robust cookware alongside delicate items. Our Flex Baskets are designed to accommodate those bulkier items and provide an even, thorough clean. We have two options of basket flexibility to choose from.

Flex 1

Two foldable flip tines in the top basket and two foldable flip tines in the bottom basket offer quick and easy loading flexibility for safe positioning of glasses, cups, pots and pans.

Flex 2

Two foldable flip tines in the top basket and four foldable flip tines in the bottom basket offer quick and easy loading flexibility for safe positioning of glasses, cups, pots and pans.

Flex 3

Six foldable flip tines in the top basket and eight foldable flip tines in the bottom basket offer quick and easy loading flexibility for safe positioning of glasses, cups, pots and pans.

Flex Cutlery Drawer

Transform your third loading level into a versatile cutlery drawer. It handily clicks into place whenever you need a tailor-made space for your forks, knives, and small kitchen utensils.

Rack-Matic

Allows the top basket to be raised and lowered as needed as well as run on an angle to cater for the wine glasses at the end of the night.

All of our dishwashers have Aqua Stop water protection, detergent aware, Dosage Assist and a door lock as standard. All NEFF dishwashers are suitable for use with doors from 2.5kg-8.5kg apart from SlimLine S875HKX20G (2.5kg to 7.5kg) and VarioHinge models S195HCX26G and S295HCX26G (4.5kg to 11.0kg) if the correct door springs are installed.

• = Yes, model has this feature

¹ On an energy-efficiency class scale from A to G.

² Energy consumption in kWh/100 operating cycles (using Eco programme).

³ Water consumption in litres/operating cycle (using Eco programme).

⁴ Duration of Eco programme.

⁵ We would recommend our dishwashers are connected to the mains water supply where possible. However, they may also be connected to an external water softener as long as the

water softener produces softened water of less than 1.1 mmol/litre (7.0°e) and the water softener in the appliance is turned off. Please contact product advice for further information. Water pressure required: 0.5-10 Bar. Flow rate: 10 litres per minute. Inlet valve connected directly to 3/8" screwed joint.

⁶ Adjustable upper basket is 2-stage Rackmatic™ when Flex 3rd Basket is installed.

⁷ Largest loadable dish height in upper basket will be smaller when Flex 3rd Basket is installed.

LAUNDRY

NEFF LAUNDRY RANGE

- Comprehensive range of laundry solutions.
- 3 types of laundry appliances
 - Integrated Washing Machines
 - Integrated Washer Dryers
 - Freestanding Washer Dryer – ideal for a utility room
- All feature our signature innovations.
- Features that suit an open plan kitchen installation with laundry as part of it include;
 - Time Light to see when the cycle has ended.
 - Anti Vibration Side panels to minimise noise.
- All features detailed in the following section.

5 Year Warranty

Peace of mind built-in – many of NEFF's laundry appliances are covered by our **5 year warranty** – clearly marked in the matrix tables. Further warranty information can be found on NEFF Customer Service pages 262-263.

Key Functions Guide

Key Features

INTELLIGENT WATER SYSTEM

Efficient washing is made simple with our built-in load sensor. With up to 256 load levels distinguished and a flow sensor for detecting the kind of textile, the amount of water used is tailored to your wash.

SENSOR DRYING

Continuously monitors the drying performance using sophisticated sensors to prevent overheating and over drying. The dryer stops automatically when the correct level of dryness is reached to deliver the finest fabric care and reduce ironing.

ANTI-VIBRATION SIDE PANELS

Our side panels increase stability and reduce vibrations during even the fastest spin cycle. With a 3-step system which absorbs motor vibrations, centres unbalanced laundry and compensates for vibrations on the side walls, you benefit from low noise washing with every load.

Additional Features

TIME DELAY

Allows you to programme the machine up to 24 hours in advance to suit any schedule or to take advantage of off-peak electricity rates.

DRUM LIGHT

The drum interior LED light is a big help when unloading your fully-integrated NEFF built-in washing machine. It lights up the inside brightly enough so you'll never overlook another item of laundry.

Programmes

STAIN-REMOVAL PROGRAMME

Banish even the most stubborn stains with our stain-specific programmes. With dedicated settings for red wine spillages, tomato splashes and butter/oil residue, there's no need to worry about cooking-related stains.

Options

LESS IRONING

Reduces the creasing of clothes as the water is gently removed from the wash with a light interval spin at the end of the cycle.

EXTRA RINSE OPTION

Available on almost every programme, it's especially helpful for sensitive skin.

TIME LIGHT

The time remaining of the wash cycle is clearly projected on to any floor surface. So you don't have to open the door to see when your washing will be finished. Perfect for open plan kitchens. Featured on model W544BX2GB.

EASY INSTALLATION - CARDAN DRIVE

With our Cardan Drive system, installing your built-in washing machine is super easy. Our machines can easily be adapted to the height of your worktop. The Cardan system allows the rear feet to be adjusted from the front of the washer, for any niche up to 60mm. Slide the machine into your kitchen unit, then simply adjust the feet easily from the front with a screwdriver.

AQUA STOP / AQUA SECURE

Protects inlet hoses from leakage. A safety valve prevents any more water from entering the washing machine.

RELOAD FUNCTION

If you need to add or remove an item after the programme has started, you can pause the cycle by pressing the Start/Reload button. The machine will check whether you can open the door and, if so, it lets you. To resume operation, just press the Start/Reload button again.

DRUM CLEAN WITH REMINDER

Prevent odours and germs with our handy Drum Clean reminder. When the machine detects a consecutive number of low washing temperatures (<40°), you'll be prompted to start the Drum Clean programme.

SPEED PERFECT

Cuts programme times by up to 65%. Simply select the cycle you wish to run and then select Speed Perfect.

Some features are relevant for freestanding models only. For full details please refer to the website.

VISIT OUR WEBSITE AT
 **NEFF-HOME.COM/UK**
 **NEFF-HOME.COM/IE**

*We're available 7 days a week. For our opening hours please check our website. Calls are charged at the basic rate, please check with your telephone service provider for exact charges. In some areas we may use an approved service partner and the process may vary for repairs carried out by our service partners.

NEFF is a division of BSH Home Appliances Limited, a company registered in England and Wales under company registration number 01844007, with registered office at: Grand Union House, Old Wolverton Road, Wolverton, Milton Keynes, Buckinghamshire, MK12 5PT.

NEFF WARRANTIES

From time to time, NEFF may present additional warranties on either products or defined components of a product which are time limited offers. To check if your product qualifies, or to see the full list of warranty options, please visit our website at: neff-home.com/uk/service/warranty

2 Years Warranty

All NEFF home appliances come complete with a 2 years warranty as standard to protect against any manufacturing or material faults during this period.

5 Years Warranty

For a limited time only, selected NEFF home appliances come with a free 5 years warranty. Offer applies to selected NEFF models purchased between 01.04.26 - 31.03.27 and registered within 3 months of purchase.

Lifetime Aqua Stop Warranty

This lifetime warranty protects against water damage caused by a defective Aqua Stop system. Valid on all NEFF washing machines and NEFF dishwashers with an Aqua Stop system.

10 Years Anti-Rust Warranty

This 10 years warranty protects against rust in the inner cavity of NEFF dishwashers. Valid on all NEFF dishwashers purchased from 01.01.2012 onwards.

10 Years Compressor Drive® Motor Warranty

This 10 years warranty covers the Compressor Drive® motor only on selected NEFF refrigeration appliances.

10 Years Silent Drive Warranty

This 10 years warranty protects the motor on your washing machine, ensuring it runs as efficiently as possible.
